Selling Happiness:

Selling Happiness Ellen Johnston Laing, 2004-01-01 As the first substantial investigation of commercial art in China *Selling Happiness* explains how the early twentieth century Chinese public came to accept Western style art as mainstream and the heretofore ignored process by which the Chinese art world became in some sectors at least thoroughly cosmopolitan. A monumental study of the most important genre of modern Chinese commercial art this volume will appeal not only to historians of Chinese art but also to those interested in literary economic and social history. It will be an essential resource for comparative studies of visual culture. BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Selling Happiness Ellen Johnston Laing, 2004-08-31 From the early twentieth century until the Communist takeover in 1949 Shanghai commercial artists created thousands of colorful posters and black and white advertisements that formed an essential part of modern life in the city. This visually appealing and richly illustrated work describes the origin and evolution of modern commercial art in China focusing on colorful advertisement calendar posters that featured distinctive feminine images. It makes clear how essential commercial art and its institutional backing were to the development of modern art and even modern society in China over the past century. *Selling Happiness* discusses not only advertising art but also the production and marketing of the calendar poster. These posters like other advertisements were rendered in a Western realistic technique and were wildly and widely popular. Ordinary people throughout China often acquired them to decorate their homes. Laing outlines how the Chinese commercial artist who rarely attended formal Western art classes gained skills in Western representational art. In the final chapter of the book she explains how the styles developed by the commercial poster artists during the 1920s and 1930s became the basis for certain types of propaganda art under the Chinese Communists in the 1950s and 1960s.

Happiness in America Lawrence R. Samuel, 2018-11-08 Much interest currently revolves around happiness in America so much so that one could reasonably argue that there is a happiness movement afoot The wide range of arenas in which happiness intersects reflects the subject's centrality in everyday life in America these past one hundred years Happiness in America charts the course of happiness within American culture over the past century and concludes that most Americans have not had success becoming appreciably happier people despite considerable efforts to do so Rather than follow a linear path happiness has bobbed and weaved over the decades its arc or trajectory a twisting and unpredictable one Happiness has also both shaped and reflected our core values with its expression at any given time a key indicator of who we are as a people The book thus adds a missing and valuable piece to our understanding of American culture Beyond serving as the definitive guide to happiness in this country Happiness in America offers readers a provocative argument that challenges standard thinking Despite popular belief Americans have never been a particularly happy people Our perpetual and futile search for happiness indicates widespread dissatisfaction and discontent with life in general something that will come as a surprise to many The image of Americans as a happy go lucky people is thus more mythology than reality an important finding rooted in the inherent flaws of consumer capitalism Our competitive and comparative American Way of Life has not proven to be an especially good formula for happiness Samuel argues with external signs of success unlikely to produce appreciably happier people Given these findings he suggests readers consider abandoning their pursuit of happiness and instead seek out greater joy in life

The Happiness Fantasy Carl

Cederström, 2018-10-22 In this devastatingly witty new book Carl Cederström traces our present day conception of happiness from its roots in early twentieth century European psychiatry to the Beat generation to Ronald Reagan and Donald Trump He argues that happiness is now defined by a desire to be authentic to experience physical pleasure and to cultivate a quirky individuality But over the last fifty years these once revolutionary ideas have been co-opted by corporations and advertisers pushing us to live lives that are increasingly unfulfilling insecure and narcissistic In an age of increasing austerity and social division Cederström argues that a radical new dream of happiness is gathering pace There is a vision of the good life which promotes deeper engagement with the world and our place within it over the individualism and hedonism of previous generations Guided by this more egalitarian worldview we can reinvent ourselves and our societies
