Natural Disasters, Cultural Responses

Christof Mauch, Christian Pfister, 2009-03-16 Catastrophes it seems are becoming more frequent in the twenty first century According to UN statistics every year approximately two hundred million people are directly affected by natural disasters seven times the number of people who are affected by war Discussions about global warming and fatal disasters such as Katrina and the Tsunami of 2004 have heightened our awareness of natural disasters and of their impact on both local and global communities Hollywood has also produced numerous disaster movies in recent years some of which have become blockbusters This volume demonstrates that natural catastrophes earthquakes hurricanes floods etc have exercised a vast impact on humans throughout history and in almost every part of the world It argues that human attitudes toward catastrophes have changed over time Surprisingly this has not necessarily led to a reduction of exposure or risk The organization of the book resembles a journey around the globe from Europe to North Africa the Middle East and Asia and from the Pacific through South America and Mexico to the United States While natural disasters appear everywhere on the globe different cultures societies and nations have adopted specific styles for coping with disaster Indeed how humans deal with catastrophes depends largely on social and cultural patterns values religious belief systems political institutions and economic structures The roles that catastrophes play in society and the meanings they are given vary from one region to the next they differ and this is one of the principal arguments of this book from one cultural political and geographic space to the next The essays collected here help us to understand not only how people in different times throughout history have learned to cope with disaster but also how humans in different parts of the world have developed specific cultural social and technological strategies for doing so

Theodore Roosevelt

Kathleen Dalton, 2007-12-18 He inherited a sense of entitlement and obligation from his family yet eventually came to see his own class as suspect He was famously militaristic yet brokered peace between Russia and Japan He started out an archconservative yet came to champion progressive causes These contradictions are not evidence of vacillating weakness instead they were the product of a restless mind bent on a continuous quest for self improvement In Theodore Roosevelt historian Kathleen Dalton reveals a man with a personal and intellectual depth rarely seen in our public figures She shows how Roosevelt's struggle to overcome his frailties as a child helped to build his character and offers new insights into his family life uncovering the important role that

Roosevelt's second wife Edith Carow played in the development of his political career. She also shows how TR flirted with progressive reform and then finally committed himself to deep reform in the Bull Moose campaign of 1912. Incorporating the latest scholarship into a vigorous narrative, Dalton reinterprets both the man and his times to create an illuminating portrait that will change the way we see this great man and the Progressive Era.
