Sovereign (In) Equality in International Organizations Athena Debbie Efraim, 2021-10-25 This book challenges the dominant intellectual assumptions of mainstream international law scholarship regarding the principle of Sovereign Equality The animus and scope of this challenge is situated in the context of the decision making processes in International Governmental Organizations IGOs which employ the one state one vote and/or the weighted voting rule Using the theories of Functionalism and Legitimacy to analyze the legal implications and complications of the principal voting mechanisms and voting practices of certain key IGOs vis vis the doctrine of Sovereign Equality the author establishes that this doctrine has

remained far too orthodox for contemporary realities In this context she emphasizes the importance of the necessity for functional legitimate decision making processes in global governance and accordingly advocates the elimination of the anachronistic and non viable principle of Sovereign Equality from international institutional law The author also rejects the introduction of any new principle in IGOs e g democratic governance which will render decision making even less functional
