increasing importance of tone in the Chinese language from the fifth century onwards It was natural that this change should be reflected in Chinese prosody A certain Sh n Yo a d 441 513 first propounded the laws of tone succession in poetry From that time till the eighth century the L shih or strictly regulated poem gradually evolved But poets continued and continue till to day side by side with their l shih to write in the old metre which disregards tone calling such poems Ku shih old poems Previous European statements about Chinese prosody should be accepted with great caution Writers have attempted to define the l shih with far too great precision *Braille Book Review* ,2000
