Making Enrollment Management Work Rebecca R. Dixon, 1995 **Making Enrollment Management Work** Rebecca R. Dixon, 1995-12-06 The term enrollment management has been around for almost twenty five years It arose from the recognition that enrollment declines that began in the mid 1970s would not be arrested by better or more recruitment Rather college and universities would need to integrate a number of activities and programs and in the process probably redefine their purposes It became clear that an admission office even one that acts in concert with the financial aid office should not be solely responsible for maintaining adequate enrollment Succinctly stated enrollment management is finding enrolling and retaining enough of the kinds of students an institution wants Although offices of outreach admission and financial aid may be outside their immediate jurisdictions student affairs professionals have much to do with managing enrollments This volume examines several of the most important areas of enrollment management for the benefit of student service administrators This is the 71st issue of the quarterly journal *New Directions for Student Services*

Creating Sustainable Careers in Student Affairs Margaret Saltee, 2023-07-03 This book argues that the current structure of student affairs work is not sustainable as it depends on the notion that employees are available to work non stop without any outside responsibilities that is the Ideal Worker Norm The field places inordinate burdens on staff to respond to the needs of students often at the expense of their own families and well being Student affairs professionals can meet the needs of their students without being overworked The problem however is that ideal worker norms pervade higher education and student affairs work thus providing little incentive for institutions to change The authors in this book use ideal worker norms in conjunction with other theories to interrogate the impact on student affairs staff across functional areas institutional types career stage and identity groups The book is divided into three sections chapters in the first section of the book examine various facets of the structure of work in student affairs including the impact of institutional type and different functional areas on employees work lives Chapters in the second section examine the personal toll that working in student affairs can take including emotional labor s impact on well being The final section of the book narrows the focus to explore how different identity groups including mothers fathers and people of color navigate work life issues Challenging ideal worker norms all chapters offer implications for practice for both individuals and institutions **Leadership through Collaboration** Ann S. Ferren, Wilbur W. Stanton, 2004-02-28 This book is organized around 11 topics including the skills and personal qualities needed to provide effective academic leadership strengthening the infrastructure for academic affairs through strategic planning facilities planning and technology integration the importance of developing new resources and linking them to academic priorities academic entrepreneurship assessing academic quality and improving programs and services continuous

improvement the central importance of investing in the faculty and improving academic decisions The chief academic officer must be the voice for the campus s academic purposes and a source of energy in supporting the activities of others Collaboration with colleagues across the institution is key to Ferren and Stanton s approach Their experiences in administrative roles ranging from department chair to provost have provided them with the ability to conduct and utilize many studies including budget adequacy modeling and salary equity studies These are issues for which the authors have been responsible for implementation and decision making allowing them to understand that collaborative processes and partnerships such as chairs with deans deans with vice presidents faculty with administrators or the CAO with members of the president s cabinet are as important as informed decision making Because CAOs are less likely to read what business officers and vice presidents for administration read this book attempts to integrate differing institutional perspectives and explain processes and criteria CAOs can tailor their decisions to institution circumstances and solve problems with greater insight
