political consequences of globalization the authors concentrate on six states in advanced capitalist societies SIACS the United States the United Kingdom Sweden France Germany and Japan For comparative purposes other states particularly those with developing economics are referred to and discussed where relevant The book concludes by systematically describing and assessing contemporary globalization and appraising the implications of globalization for the sovereignty and autonomy of SIACS It also confronts directly the political fatalism that surrounds much discussion of globalization with a normative agenda that elaborates the possibilities for democratizing and civilizing the unfolding global transformation

Robert J. Holton,2017-03-23 This book offers a clear and concise account of the key debates in the globalization literature serving as an accessible introduction to students new to the topic It deals even handedly with all the various dimensions of globalization political economic social and cultural and particularly draws attention to the role of people in processes of globalization The book s historical dimension and its multicultural focus ensure that globalization is shown neither to be an inexorable process nor one that can be equated simply with Westernization Education in the Era of Globalization Klas

Roth,Ilan Gur-Ze'ev,2007-10-11 Education seems to have lost its orientation in Western culture and is in disarray all over the globe in time of global transitions Globalizing capitalism is the general headline for some of the most profound deep and dramatic developments in our era that education must address The response of educationalists is only in its beginning and there is an urgent need to address the dramatic changes inflicted on promised to our era philosophically sociologically culturally ecologically physically aesthetically and politically In the proposed book we try to address the challenge of

globalization to education in the broadest sense of the concept of education by treating this challenge in various perspectives through different disciplines and topics within which the challenge of globalization is conceived as the most profound dynamic of this historical moment a development that is realized in many diverse and different levels fields and spaces of human and natural existence The various texts in this collection written by some of the famous and interesting scholars in the field of philosophy of education and the sociology of education try to address the richness and diversity of the challenge of globalization It tries to reconstruct historically sociologically and philosophically the roots the practices and the fruits of globalization as a threat and as a gateway for new possibilities for today s education The collection is a meeting point for research that is not only analytical and critical but also offers new roads and possibilities for education in the 21st century in face of globalization As such this collection is unique in this field and opens the door for further research and public discussion on the future role of education

Globalization and Money Supriya Singh,2013-10-03 *Globalization and Money* explores how men and women particularly the poor and the unbanked in the global South use money in ways that empower themselves and their families Supriya Singh argues that money as a

medium of relationships across cultures is a central component of globalization. She deftly weaves theory and individual stories to show how money is emblematic of interconnected markets, the half of the world that is unbanked, and gender disparities. She shows how men's and women's banking patterns are tied to their management of money in the household. Migrants send money home to show they care for their families and communities left behind. Yet these remittances are far from symbolic; instead, they represent more than three times the total amount of official development assistance. This book illustrates how many of the most exciting changes in harnessing people's savings, widening credit, and insurance, and lowering the cost of technologies, payments, and money transfers are taking place in Africa, Asia, and Latin America. Singh demonstrates how strategies to help the poor and marginalized have gone global in South-South conversations, making us rethink the contours of globalization and money.

Global Empowerment: Emerging Practices Uma Narula, 2008-10

Making Globalisation a Force for Good Great Britain. Department of Trade and Industry, 2004. Globalisation refers to the process of growing interdependence between the economies and businesses of different countries with the ever-increasing movement across national boundaries of goods, services, investment, finance, and jobs. This White Paper considers the Government's policy approach towards international trade and investment based upon its commitment to sustainable development and in the context of an enlarged EU. It addresses the implications of globalisation both nationally and internationally and sets out the Government's vision of a world trading system which is fair as well as free for all. It contains three sections which focus on: i) the internationalisation of business markets and production; EU developments and the experience of developing countries; ii) how to ensure the UK economy benefits from globalisation; and iii) the role of trade and investment in global poverty reduction, including the Doha Development Agenda, market liberalisation in developing countries, international regulation, agricultural trade and development, environmental protection, and labour standards, promoting corporate social responsibility, and improving the functioning of the World Trade Organization.

A Fair Globalization, 2004. The World Commission on the Social Dimension of Globalization was established as an independent body by the International Labour Organization in February 2002 in light of the unprecedented socio-economic changes implemented by globalisation trends.

This report explores how the ILO can help promote the objective that decent work should become a global goal. It examines six broad policy themes related to national policies to address globalisation: decent work in global production systems, growth, investment and employment, constructing a socio-economic floor, the global economy and the cross-border movement of people, and strengthening the international labour standards system. The report also discusses how the ILO can respond to the Commission's call for the multilateral system to enhance participation and accountability and to make a full contribution to the building of a social dimension for globalisation.

The Ebb and Flow of Globalization Huiyao Wang, 2022-08-02

Globalization is an irresistible force. Given the high stakes at hand for stability, continued growth, and the future of our planet, it is more important than ever that China gain a deeper understanding of the rest of the world and that the rest of the world also comes to a clearer understanding of China. This book focuses on globalization and China's evolving role in the world, offering unique perspectives on a remarkable period which saw the global landscape reshaped by China's continued rise, intensifying great power competition, and a deadly pandemic. The essays center on three interconnected themes: China's remarkable development under the Reform and Opening up policy; China's deepening integration into the global economy and rise in a multipolar world; and the quest to reinvigorate global governance and multilateralism to address the pressing global challenges of the 21st century. These insights are useful for academics, policymakers, students, and anyone trying to deepen their understanding of China's development and role in making globalization work for our multipolar world.
