10 Great Curricula Thomas S. Poetter,2012-01-01 With Susan L M Bartow Lara A Chatman Daniel Ciamarra Christopher L Cox Dawn Mann Kevin J Smith Kevin M Talbert Mary A Webb and Amy Fisher Young 10 Great Curricula is a collection of stories written by educators who have come to understand curricula differently as a result of their engagement with a graduate course and its instructor The book represents the best of what can be found in teaching and learning in general and in the quest for meaningful ways to understand curricula in particular The co authors of this volume on 10 Great Curricula framed their inquiries into progressive democratic curricula at least initially through Marsh and Willis 2007 notions of planned enacted and lived curricula These frames helped the writers think about how to engage a curriculum as it is developed delivered and lived by its participants and for the inquirers to actually become participantinquirers in the curriculum at hand The chapters depict the power the possibility and the transformational potential of great progressive curricula today by locating them in schools and in the community by making them come alive to the reader and by suggesting means through which the reader can adopt a more progressive democratic stance to curriculum despite the seemingly overwhelming nature of the conservative traditionalist instrumentalist movements in curriculum teaching and assessment today The book is intended for students of education teaching and curriculum undergraduates graduates and practicing educational professionals especially those looking for examples in the world in which progressive democratic ideals are nurtured and practiced

Literacy Matters Robert Yagelski, 2000 Literacy can empower students but it may also limit their understanding if taught without regard for the context of their lives Using his encounters with students in high school college and state prison classrooms as well as his own experience Robert Yagelski looks at the sometimes ambiguous role of literacy in our lives and examines the mismatch between conventional approaches to teaching literacy and the literacy needs of students in a rapidly changing increasingly technological world He asserts that ultimately the most important job of the English teacher is to reveal to students ways they can participate in the discourse that shapes their lives and he offers a timely look at how technology has influenced the way we write and read The scope of this fascinating book reaches beyond the classroom and offers insight about what it means to be literate in an economically driven dynamic society Addressing earlier works on the subject of literacy as well as the ideas of theorists such as Foucault this perceptive work has much to offer educators and anyone seeking to understand the nature of literacy itself

[Open and Distance Learning in Secondary School Education in India](#) Jyotsna Jha, Neha Ghatak, Puja Minni, Shobhita

Rajagopal, Shreekanth Mahendiran, 2019-11-19 This book examines the state of the Open and Distance Learning (ODL) based secondary education in India. ODL based education has been a key resource for children in India who can neither cope with nor avail of regular schooling opportunities due to economic health and disability or other constraints. The volume uses large scale empirical data collected from various Indian states and a sensitive theoretical framework to study the equity, efficiency and effectiveness of the National Institute of Open Schooling (NIOS) and the State Open School (SOS). Highlighting the roadblocks and barriers in terms of its reach, inclusion and delivery, particularly to the marginalised, this book explores whether ODL has a potential of being a sustainable and effective option at the secondary and senior secondary level in India. Thus it seeks to generate policy discourse around delivery mechanisms and effectiveness of ODL in developing countries. First of its kind, this comprehensive volume will be useful for scholars and researchers of education, education policy, public policy and political studies.
