Mohrman, William A. Pasmore, Bengt Stymne, Niclas Adler, 2007-08-23 This handbook provides the latest thinking methodologies and cases in the rapidly growing area of collaborative management research What makes collaborative management research different is its emphasis on creating a close partnership between scholars and practitioners in the search for knowledge concerning organizations and complex systems In the ideal situation scholars and their managerial partners would work together to define the research focus develop the methods to be used for data collection participate

equally in the analysis of data and work together in the application and dissemination of knowledge The handbook contains insightful reflections on the state of the art as well as detailed descriptions of the collaborative efforts of an international group of leading edge academics and their practitioner counterparts The applications of collaborative research methods included in this volume include those aimed at individual development organizational development regional development efforts and economic policy The insights from the cases suggest that collaborative management research has been a highly effective means of getting at issues that other research methods and intervention techniques have failed to address The rationale for conducting this highly engaging type of research is explored in the first section of the handbook followed by sections that offer new methodologies descriptive cases views from those directly involved and issues and enablers about the use of this approach in advancing knowledge and practice The handbook does appeal to scholarly practitioners as well as practical scholars

Beyond Method Gareth Morgan,1983-05 Research is often seen as a neutral technical process through which researchers simply reveal or discover knowledge A broader and more self reflective stance is advocated in Beyond Method one in which a knowledge of technique needs to be complemented by an appreciation of the nature of research as a distinctively human process through which researchers make knowledge Such an appreciation requires a reframing of understanding and debate about research in a way that goes beyond considerations of method alone
