Making Nature:

Making "Nature" Melinda Baldwin, 2015-08-18 Nature's shifting audience 1869 1875 Nature's contributors and the changing of Britain's scientific guard 1872 1895 Defining the man of science in Nature Scientific internationalism and scientific nationalism Nature interwar politics and intellectual freedom It almost came out on its own Nature under L J F Brimble and A J V Gale Nature the Cold War and the rise of the United States Disorderly publication Nature and scientific self policing in the 1980s **Making Nature Social** Rembrandt Zegers, 2024-06-15 As the global climate crisis and biodiversity loss deepen their impact and gain pace Making Nature Social Towards a Relationship with Nature provides core insights into what it means to understand our relationship to nature This relationship is illustrated through interviews with people working in different nature practices including engaging with nature non human animals place advocacy and with work organization values Rembrandt Zegers argues that since non humans do not use human language meaning is conducted through the senses giving rise to a knowing that manifests itself through the body first before finding its way socially in human language Through these senses the relation to non human others and nature can become a conversation in other words a relationship built on reciprocity The book illustrates how these meanings occur and how these conversations happen how crucial they are and how they are connected It dives deep into the essence of the lived experience of our relationship to nature and in doing so acknowledges how important the lived experience is for the purpose of a relationship with nature

Making Nature Whole William R. Jordan, George M. Lubick, 2011-07-26 Making Nature Whole is a seminal volume that presents an in depth history of the field of ecological restoration as it has developed in the United States over the last three decades The authors draw from both published and unpublished sources including archival materials and oral histories from early practitioners to explore the development of the field and its importance to environmental management as well as to the larger environmental movement and our understanding of the world Considering antecedents as varied as monastic gardens the Scientific Revolution and the emerging nature awareness of nineteenth century Romantics and Transcendentalists Jordan and Lubick offer unique insight into the field's philosophical and theoretical underpinnings They examine specifically the more recent history including the story of those who first attempted to recreate natural ecosystems early in the 20th century as well as those who over the past few decades have realized the value of this approach not only as a critical element in conservation but also as a context for negotiating the ever changing relationship between humans and the natural environment Making Nature Whole is a landmark contribution providing context and history regarding a distinctive form of land management and giving readers a fascinating overview of the development of the field It is essential reading for anyone interested in understanding where ecological restoration came from or where it might be going **Making Nature, Shaping Culture** , 1995-01-01 For ages farmers have domesticated plant varieties while scientists have made nature through hybridization and other processes This give and take mediated through negotiations persuasion the marketplace and even

coercion has resulted in what we call nature and has led to a homogenization of plant crops Yet homogenization has led to new problems genetic vulnerability and the lack of systems to maintain plant germplasm of varieties no longer grown in the fields This book addresses issues previously viewed as primarily technical concerning the germplasm debate that is how what and where to store the range of genetic materials necessary to reproduce plants By examining Brazil Chile France and the United States the authors show how different cultures respond to the decline in genetic diversity The findings show that the quest for uniformity in foods agriculture and environment eventually threatens everyone The politicization of this debate is inevitable because the destruction of human cultural diversity goes hand in hand with the destruction of plant varietal diversity The authors agree that responses to the controversies must involve food security relinking of food with agriculture and the environment revaluing traditional knowledge and rethinking development They stress that answers will be found not by experts acting unilaterally but through the democratization of scientific and technical exchange Lawrence Busch is professor of sociology at Michigan State University William B Lacy is director of the Cooperative Extension Service at Cornell University Jeffrey Burkhardt is a professor of agricultural economics at the Institute for Food and Agricultural Sciences at the University of Florida Douglas Hemken is a Ph D candidate in the Department of Rural Sociology at the University of Wisconsin Jubel Moraga Rojel is professor of sociology at the Universidade Austral del Chile Timothy Koponen is a Ph D candidate in sociology at Northwestern University and Josi de Souza Silva is with the Commission on Plant Genetic Resources at FAO in Rome

Making Nature Sacred John Gatta, 2004-10-14 This book argues that the religious import of American environmental literature has yet to be fully recognized or understood Making Nature Sacred explores how the quest for natural revelation has been pursued through successive phases of American literary and intellectual history **Raw:**

Architectural Engagements with Nature Brit Strandhagen, Dr Hege Charlotte Faber, Dr Solveig Bøe, 2014-10-28 Through cross disciplinary explorations of and engagements with nature as a forming part of architecture this volume sheds light on the concepts of both nature and architecture Nature is examined in a raw intermediary state where it is noticeable as nature despite but at the same time through man's effort at creating form This is done by approaching nature from the perspective of architecture understood not only as concrete buildings but as a fundamental human way both of being in and relating to the world Man finds and forms places where life may take place Consequently architecture may be understood as ranging from the simple mark on the ground and primitive enclosure to the contemporary megalopolis Nature inheres in many aesthetic forms of expression In architecture however nature emerges with a particular power and clarity which makes architecture a raw kind of art Even though other forms of art as well as aesthetic phenomena outside the arts are addressed the analogy to architecture will be evident and important Thus by using the concept of raw as a focal point this book provides new approaches to architecture in a broad sense as well as other aesthetic and artistic practices and will be of interest to readers from different fields of the arts and humanities spanning from philosophy and theology to history of art architecture

and music Becoming Nature Positive Marco Lambertini, Joseph W. Bull, Leroy Little Bear, Harvey Locke, Eva Zabey, Dorothy Maseke, Carlos Manuel Rodríguez, 2025-06-02 As humanity sits at an existential crossroads this book introduces the need to build a nature positive future to secure the functioning and stability of Earth systems essential to the survival and wellbeing of present and future human generations as well as the rest of Earth's amazing diversity of life. Alongside the change in climate a more silent but equally terrifying crisis is unfolding the loss of nature and biodiversity. These twin crises are in fact interconnected. After decades of ignoring our impacts on the natural world we are beginning to realise that nature conservation is a security issue for humanity and an imperative for intersectional and intergenerational justice. For these reasons we must embrace a transition from a nature negative to a nature positive society one that ensures human development and addresses today's inequality while conserving, restoring and sustainably benefiting from nature's resources and services. A Nature Positive future is one with more nature than today more forests more fish more pollinators more soil biodiversity with benefits for the Planet and for us. In this book we define what becoming Nature Positive means from a variety of perspectives what it takes to deliver it and why it is possible and most importantly necessary. This book is essential reading for those concerned with conserving nature and securing a safe future for humanity in the face of climate breakdown biodiversity loss and ecological collapse. The future can be bright. The choice is ours. The Teaching of Nature Study and Elementary Science for Grades Kindergarten to Eight New Jersey. Department of Public Instruction, 1929

Leibniz on the Nature of the Church Avelino González-Ferrer, 2025-09-18 Gottfried Wilhelm Leibniz 1646-1716 one of the most prominent figures in both the history of philosophy and the history of mathematics but also one of the greatest advocates of Christian unity of the early modern period may just have the solution to divisions within the Church with his unique understanding of the nature of the Church. Leibniz's unique theological metaphysics and pioneering thought on the centrality of the concept of person makes his ideas on the nature of the Church particularly promising. The book presents how Leibniz's ideas are formed by history and meetings with extraordinary figures and how these ideas mature and develop through time into a theological metaphysics and much later as a philosophy of personalism that secures Leibniz's place as an early pioneer of the philosophical movement of personalism. *Leibniz on the Nature of the Church* presents a historical systematic and provocative reading of these until now overlooked ideas. **The Irish Monthly**, 1889 A Compilation of the Tennessee Statutes of a General Public Nature, in Force on the First Day of January, 1919 Tennessee, 1919 **The Ordinance Making Powers of the President of the United States** James Hart, 1925 **Economica**, 1921 Covers international research in all branches of economics Nature Sir Norman Lockyer, 1877 *The Rocky Mountain Educator*, 1902 Cornell Science Leaflet, 1921 A History of the Earth and Animated Nature Oliver Goldsmith, 1881 The New Nature Library, 1905 Hibbert Journal, 1917 How to Deal with Human Nature in Business Sherwin Cody, 1915

Yeah, reviewing a book **Making Nature** could accumulate your near friends listings. This is just one of the solutions for you to be successful. As understood, skill does not suggest that you have extraordinary points.

Comprehending as competently as bargain even more than further will meet the expense of each success. bordering to, the proclamation as well as acuteness of this Making Nature can be taken as capably as picked to act.
