**The Varieties of Religious Experience** William James,1929      **Marriage and Civilization** William Tucker,2014-02-03 In his stunning new book *Marriage and Civilization* author William Tucker looks at the evidence from biology evolution anthropology history and culture to come to a remarkable conclusion it was the monogamous pairing of male and female unusual among mammals that led to human evolution Moreover it is monogamous marriage that has shaped Western Civilization giving us our sense of justice undergirded Western democracy and is the greatest institution we have for perpetuating human freedom and happiness Yet marriage is now under threat and perhaps not in ways that people suspect

We could actually see the de facto abolition of marriage with the state taking many of the responsibilities formerly assumed by the nuclear family Among Tucker s many eye opening observations How primitive polygamy was a retrogression from the original monogamous structure of the human family Why monogamy was essential to the development of ancient Greek democracy Why it was the Catholic Church not the Bible or Christianity in general that was the great defender of monogamous marriage in Western Civilization Why polygamous societies from primitive farming communities to the Mongols to the Muslim world to the early Mormons are internally violent and have bloody borders Why same sex marriage utterly irrelevant in evolutionary terms is a distraction from the real marriage debate we should be having The prospects for monogamous marriage and the dangers if it collapses Marriage and Civilization might be the most important provocative and talked about book of the year

*Unmarking Whiteness and the New American Racism* Michael L. Blakey, 2025-07-18 This book criticizes recent performative solutions to racism diversity programs at universities for example and White people s Fragility or intolerance of mature criticism These ideas are locked in an intellectually gated and defensive conversation that effectively denies the ongoing particular abuses of White supremacy This book instead proposes expensive educational and economic changes including reparations as necessary to achieve real equity Once imputed by the eugenical effects of World War II and the Civil Rights Movement s opposition to White racism the word race was largely stricken from scientific writing But biological determinism remained deeply ensconced in an institution of science that assumed the natural world to be determining making natural science its most authoritative means Authoritative heritability estimates and genetic correlations though spurious continued to imply that obvious racial and class inequalities including their dire health effects were natural and acceptable White people often attempted to unmark their racial identity and assumed that of the uniquely normal people as though an act of anti racism Frankenberg shows On the contrary it served to deny their skin color privileges while enjoying benefits of ongoing structural racism as the only real complete human beings in the room This book uses an ethnology of anthropology to show White people s equivocal views of other s equality in their formal analyses museum collections and exhibitions and treatment of colleagues in recent times They remained deliberately deaf to critical African diasporic scholarship Thus *Unmarking* gives an anthropological analysis of the social history of White supremacy and shows what it is like for some to confront it In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

**A Century of Controversy** Elman R Service, 2014-05-10 A Century of Controversy Ethnological Issues from 1860 to 1960 is an

assessment of the history of ethnology in terms of its intellectual progress with emphasis on the controversial issues that were broached between 1860 and 1960 Two related philosophical or theoretical poses that characterized the prominent ethnological thinkers of this period and earlier are related to this phenomenon One was the prevalent positivism the other the belief in human progress as a form of social cultural and mental evolution Comprised of 19 chapters this volume begins by looking at several eminent scholars dealing more closely with the subject of ethnology including Henry Maine and John F McLennan in Great Britain Johann J Bachofen in Switzerland and Fustel de Coulanges in France In particular the chapter examines the disagreement among Maine Bachofen McLennan and Fustel de Coulanges as to the nature of the earliest society and its form of marriage the nature of the evolutionary transformations of society especially from primitive society to civilization and the actual meaning and function of kinship terminology The next two chapters describe the positive useful discoveries as well as the mistakes and weaknesses of Lewis H Morgan s work with particular reference to his classificatory kinship nomenclature Subsequent sections focus on controversies surrounding kinship terminology social structure the origins of government the economic life of primitive peoples and society and culture This book will be of interest to scholars of anthropology archaeology and ethnology

**Anthology of American Negro Literature** Victor Francis Calverton, 1929

*Humphrey Clinker* Tobias Smollett, 1929 *The Charterhouse of Parma* Stendhal, 1925 Description of the Battle of Waterloo is background for this story of Italian love and intrigue **The Red and the Black** Stendhal, 1926 The son of a carpenter Julian Sorel is inspired by the writings of Napoleon to conquer the heights of society His initial plan to work his way up through the church is however thwarted when he is forced to accept employment as a tutor and this rash social entrepreneur certainly has not considered the dangers of falling in love Stendhal s novel is an amusing and piquant study of hypocrisy and free will in post Napoleonic France *Buddenbrooks* Thomas Mann, 1924 **Passages from the Diary of Samuel Pepys** Samuel Pepys, 1923 *Racial Segregation and Eugenical Science Between the Wars* Michael L.

Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized

dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies      **Penguin Island** Anatole France, 1909 Penguin Island in all its peculiar glory this is the tale of the enchanted island where the nearsighted Abbot Mael baptised penguins in error These penguins possessed of Divine Grace by dint of baptism are remarkably like and unlike men they rule the fictional land of Penguinia Jacketless library hardcover Copyright Libri GmbH All rights reserved
