Mallmann Showell, 2014-03-24 Ocean going U boats each one not much longer than four European articulated lorries with up to sixty men inside them sailed the far off seas to reap havoc in hot inhospitable waters The air forces and navies from Britain the United States and other colonial countries followed to make this a daring and death threatening venture The facts of what the U boats achieved against massive odds have been told before but U Boats of the Second World War Their Longest Voyages is different It concentrates more on how it was done How the men survived how they lived and died and how they still found time to carry out their orders The book is based on masses of previously unpublished documents from the German U boat Museum many of them written during or shortly after the war by men who survived this bitter conflict This is the story of how specially built long range ocean going U boats started out one step ahead of the Allied navies and air power how they fell one step behind and how they finally vanished into the depths of the biggest and deepest oceans This is a remarkable story of endurance courage and comradeship that terrified the world for the most critical period of the Second World War The author Jak P Mallmann Showell is the son of a U boat diesel mechanic who disappeared in those warm waters two months before the author was

born      **Making Makers** Michael P. M. Finch, 2024-05-07 Making Makers presents a comprehensive history of a seminal work of scholarship which has exerted a persistent attraction for scholars of war and strategy Makers of Modern Strategy It reveals the processes by which scholars conceived and devised the book considering both successful and failed attempts to make and remake the work across the twentieth century and illuminating its impact and legacy It explains how and why these influential volumes took their particular forms unearths the broader intellectual processes that shaped them and reflects on the academic parameters of the study of war in the twentieth century In presenting a complete genesis of the Makers project in the context of intellectual trends and historical contingency this book reflects on a more complex and nuanced appraisal of the development of scholarship on war In so doing it also offers contributions to the intellectual biographies of key figures in the history of war in the twentieth century such as Edward Mead Earle Peter Paret Gordon Craig and Theodore Ropp Making Makers contributes to an intellectual history of military history and contextualises the place of history and historians in strategic and security studies It is not only a history of the book but a history of the networks of scholars involved in its creation their careers and lines of patronage crossing international boundaries from Europe to the USA to Asia and Australia It is an investigation of ideas individuals and groups of work completed and scholarship produced as well as contingency and opportunities missed      **British Subversive Propaganda during the Second World War** Kirk Robert Graham, 2021-08-11 This book offers the first in depth intellectual and cultural history of British subversive propaganda during the Second World War Focussing on the Political Warfare Executive PWE it tells the story of British efforts to undermine German morale and promote resistance against Nazi hegemony Staffed by civil servants journalists academics and anti fascist European exiles PWE oversaw the BBC European Service alongside more than forty unique clandestine radio stations they maintained a prolific outpouring of subversive leaflets and other printed propaganda and they trained secret agents in psychological warfare British policy during the occupation of Germany stemmed in part from the wartime insights and experiences of these propagandists Rather than analyse military strategy or tactics British Subversive Propaganda during the Second World War draws on a wealth of archival material from collections in Germany and Britain to develop a critical genealogy of British ideas about Germany and National Socialism British propagandists invoked discourses around history morality psychology sexuality and religion in order to conceive of an audience susceptible to morale subversion Revealing much about the contours of mid century European thought and the origins of our own heavily propagandised world this book provides unique insights for anyone researching British history the Second World War or the fight against fascism      **The Great War and the Making of the Modern World** Jeremy Black, 2011-03-17 This new work demonstrates how the outcome of the First World War has formed the modern world we live in today The First World War was the Great War for its leading participants In revisiting the events of 1914 1918 a century on Jeremy Black considers how we now look at the impact of the conflict across the globe and how it came to be World War I in our consciousness For

millions both soldiers and civilians the conflict proved fatal The suffering and loss of the war provides much of its resonance and significance but this book seeks to throw light beyond this not least in asking how it ended in victory and defeat Casting aside the conventional narrative Jeremy Black returns to a vast range of original sources and investigates not only the key events of the war but its consequences in restructuring the old order As its significance has changed with time and not only with the loss of first hand testimony Black considers the struggle not only in its historical context but through its memorialisation today

Making Connections Margaret Walsh,2017-05-15 This book argues that legal persuasion results from making and breaking mental connections To support this argument it follows a cognitive science roadmap while the authors road test the directions through rhetorical analysis By taking a rhetorical approach to persuasion the authors are able to integrate research from cognitive science with classical and contemporary rhetorical theory and then to apply both to the taking apart and the putting together of effective legal arguments The combination of rhetorical analysis and cognitive science yields a new way of seeing and understanding legal persuasion one that promises theoretical and practical gains The work has three main functions First it brings together the leading models of persuasion from cognitive science and rhetorical theory blurring boundaries and leverage connections between the often separate spheres of science and rhetoric Second it illustrates this persuasive synthesis by working through concrete examples of persuasion from real life legal contexts In this way the book demonstrates the advantages of a deeper and more nuanced understanding of persuasion Third the volume assesses and explains why how and when certain persuasive methods and techniques are more effective than others The book is designed to appeal to scholars in law rhetoric persuasion science and psychology to students learning the practice of law and to judges and practicing lawyers who engage in persuasion

*Shakespeare and the Second World War* Irene Rima Makaryk, Marissa McHugh, 2012-01-01 Shakespeare's works occupy a prismatic and complex position in world culture they straddle both the high and the low the national and the foreign literature and theatre The Second World War presents a fascinating case study of this phenomenon most if not all of its combatants have laid claim to Shakespeare and have called upon his work to convey their society's self image In wartime such claims frequently brought to the fore a crisis of cultural identity and of competing ownership of this universal author Despite this the role of Shakespeare during the Second World War has not yet been examined or documented in any depth Shakespeare and the Second World War provides the first sustained international collaborative incursion into this terrain The essays demonstrate how the wide variety of ways in which Shakespeare has been recycled reviewed and reinterpreted from 1939 1945 are both illuminated by and continue to illuminate the War today

**The Second World War in the Air** Merfyn Bourne, 2013 This book is a complete narrative history of the Second World War in the air which starts by describing the early days of flight in order to put military air power in context when World War Two began It then moves on to a step by step coverage of the air

combat in each theatre of war Offering a comprehensive history that includes the lesser known campaigns such as the fighting in Burma Italy and East Africa as well as the air offensive in Western Europe and the struggle in the Pacific it also re-examines the RAF bombing of German cities and the moral issues raised This is the first history of the air war to give full and proportionate coverage to the war in Russia which until now has been largely ignored The Second World War in the Air is a comprehensive review of the air war It s meticulously researched readable and remains in touch with what the fighting meant for individuals in the various combatant nations *Allied Communication to the Public During the Second World War* Simon Eliot, Marc Wiggam, 2019-11-14 In the Second World War the home fronts of many countries became as important as the battle fronts As governments tried to win and hold the trust of domestic and international audiences communication became central to their efforts This volume offers cutting edge research by leading and emerging scholars on how information was used distributed and received during the war With a transnational approach encompassing Germany Iberia the Arab world and India it demonstrates that the Second World War was as much a war of ideas and influence as one of machines and battles Simon Eliot Marc Wiggam and the contributors address the main communication problems faced by Allied governments including how to balance the free exchange of information with the demands of national security and wartime alliances how to frame war aims differently for belligerent neutral and imperial audiences and how to represent effectively a variety of communities in wartime propaganda In doing so they reveal the contested and transnational character of the ways in which information was conveyed during the Second World War *Allied Communication during the Second World War* offers innovative and nuanced perspectives on the thin border between information and propaganda during this global war and will be vital reading for World War II and media historians alike *Germany and the Second World War* , 1990 This is the second in the comprehensive ten volume *Germany and the Second World War* The five volumes so far published in German take the story to the end of 1941 and have achieved international acclaim as a major contribution to historical study Under the auspices of the Militargeschichtliches Forschungsamt Research Institute for Military History a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War This volume surveys the first year of the war deliberately begun by Nazi Germany The authors examine the train of interconnected political and military events and set military operations against the background of Hitler s war policy and general aims both immediate and long term The authors show that the conflict took a course quite different from that which Hitler had intended but nevertheless resulted in a series of conquests for the Third Reich

**Strategic and Operational Deception in the Second World War** Michael I. Handel, 2012-12-06 First Published in 1987 New information obtained from the declassification of Ultra intercepts and other Second World War documents as well as from recent scholarly research has credited Allied deception operations with an even more important contribution to winning the war than was previously supposed Yet deception is only one factor in the achievement of victory it cannot

guarantee success It must be fully understood and exploited by the highest levels of command Most histories of deception operations during the Second World War have focused on those that were successful Instances in which deception operations failed to achieve their objectives are discussed by John Campbell who describes an early attempt to convince the Germans that the Allies intended to invade at Pas de Calais in the summer of 1943 and by Katherine Herbig who gives the first detailed description of US deception operations in the Pacific Klaus Jurgen Moier questions the actual effectiveness of deception operations against the Germans He argues that many successes attributed to the Allies use of deception were in fact achieved by independent considerations on the German side Professor Moier builds a particularly strong case in challenging the success of Operation Fortitude North in which the Allies tried to divert German troops to Norway before invading Normandy Although very little is known of Soviet deception operations on the Eastern Front it must be remembered that they were conducted on a much larger scale than those of either the British in Europe or the Americans in the Pacific Colonel David Glantz s account of Soviet deception and covert activities offers a version of the historiography of the war between the USSR and Germany which may explain some of the monumental German failures Tom Cubbage not only contributes a synthesis of the primary and secondary sources available on the deception operations preceding Overlord but also reviews the so called Hesketh Report Fortitude A History of Strategic Deception in North Western Europe April 1943 to May 1945 Colonel Roger Hesketh s official report on Allied deception operations against the Germans in north west Europe which was declassified in 1976 yet remains unpublished It indicates that Professor Muller s suspicions that the Allies overestimated the impact of Fortitude are unfounded Edited and with a comprehensive introduction by Michael Handel these important and original studies put the entire deception effort during the Second World War into a more balanced and accurate perspective
