## **Making Breaking Borders:**

*Breaking Borders* Alexander Harris, 2008-09 In 1939 Alexander Harris a teenager in Lodz Poland experienced the darkness of World War II and the Russian occupation of his native country He lived through a Soviet gulag and the battlefields of Germany but never let his spirit be broken He tells of friendship and betrayal war love and hate Separated from his family at a young age he triumphed over many obstacles including discrimination and torture Harris was thankful to arrive in the United States the cradle of freedom and land of opportunity in which he could begin his life anew Remaining steadfast in his determination to help overcome ignorance misconceptions and prejudices that divide people and nations he worked in the tourism profession to do his part to abolish the barriers between hostile worlds His father's words When you come to a border cross it If you cannot cross it go around it If you can't go around it break it inspired him throughout his life providing the motivation he needed to devote his professional life to breaking borders and promoting peace via the international tourism industry His work led to the receipt of numerous awards including the Ellis Island Medal of Honor

*Making and Breaking Borders*, 2000      **Breaking Borders** Kate Isler, 2021-03-02 Kate Isler's incredible story demonstrates how women can stop self-selecting out of opportunities and take the leap of faith to accomplish their dreams Kate Isler navigated the male-dominated culture of the technology industry breaking new global markets for Microsoft in their fast-paced hyper-growth startup years in some of the most challenging regions in the world all without a college degree or resources that many believe are necessary for success Kate's story is a fascinating adventure from her years as a naive young adult through her unexpected global career at a time when corporations weren't hiring women to represent their companies overseas In *Breaking Borders* Kate candidly shares Her moments of success failure and very public mistakes The struggle she faced to pivot her career in a completely new direction How she overcame the disappointment of a failed startup by channeling her passion for supporting women Her mission to inspire other women by building Be Bold a women's advocacy non-profit from the ground up Kate's story is a guide for women who want to stop self-selecting out of opportunities because they assume they don't have the right education connections or skills to take a chance      **The Sequential Artists**

Depoe, 2019-12-01 Analyzes efforts made by communities and policy makers around the world to push beyond conventional approaches to environmental decision making *Breaking Boundaries* analyzes efforts made by communities and policy makers

around the world to push beyond conventional approaches to environmental decision making to enhance public acceptance sustainability and the impact of those decisions in local contexts The current political climate has generated uncertainty among citizens industry interests scientists and other stakeholders but by applying concepts from various perspectives of environmental communication and deliberative democracy this book offers a series of lessons learned for both public officials and concerned citizens The contributors offer a broader understanding of how individuals and groups can get involved effectively in environmental decisions through traditional formats as well as alternative approaches ranging from leadership capacity building to social media activity to civic technology *Breaking Boundaries* Val Walsh, Louise Morley, 2005-08-04

This text presents evidence of the work and action of feminists in academia and shows that there is still much to be done before academia is a safe and welcoming environment for women Women integrate their experience with theory to document and challenge the obstacles to equality and difference *Vernacular Border Security* Nick Vaughan-Williams, 2021-06-01

Since the peak of Europe's so called 2015 migration crisis the dominant governmental response has been to turn to deterrent border security across the Mediterranean and construct border walls throughout the EU During the same timeframe EU citizens are widely represented by politicians by media sources and by opinion polls as fearing a loss of control over national and EU borders Despite the intensification of EU border security with visibly violent effects EU citizens are portrayed as threatened majorities These dynamics beg the question Why is it that tougher deterrent border security and walling appear to have heightened rather than diminished border anxieties among EU citizens While the populist mantra of taking back control purports to speak on behalf of EU citizens little is known about how diverse EU citizens conceptualize understand and talk about the so called crisis Yet if social and cultural meanings of migration and border security are constructed intersubjectively and contested politically Weldes et al 1999 then EU citizens as well as governmental elites and people on the move are significant in shaping dominant framings of and responses to the crisis This book argues that in order to address the overarching puzzle a conceptual and methodological shift is required in the way that border security is understood a new approach is urgently required that complements top down analyses of elite governmental practices with bottom up vernacular studies of how those practices are both reproduced and contested in everyday life **Breaking**

**Consciousness** Pasquale De Marco, 2025-08-15 In the realm of human understanding there lies an enigma that has captivated thinkers throughout history the nature of consciousness What is this mysterious faculty that allows us to experience the world to feel to think to dream How does the physical matter of our brains give rise to the subjective realm of our inner lives This book takes you on a profound journey into the enigma of consciousness exploring the latest scientific findings philosophical theories and personal experiences that shed light on this elusive phenomenon Delve into the intricate

relationship between the brain and consciousness and question how the physical processes of the brain can give rise to the subjective experience of being Unravel the mysteries of different states of consciousness from the ordinary waking state to the altered states induced by meditation dreams and psychedelic substances Explore the nature of the self the role of free will and the implications of consciousness for our understanding of reality itself As you journey through the depths of consciousness you will encounter profound questions that challenge conventional notions of existence What is the relationship between the subjective and objective worlds How can we reconcile the seemingly contradictory aspects of consciousness such as its unity and diversity And what does the existence of consciousness tell us about the nature of the universe itself This book is an invitation to embark on a quest for answers to these fundamental questions It is an invitation to peer into the depths of your own consciousness to explore the boundaries of your understanding and to embrace the awe and wonder that accompany the journey into the enigma of our being With its captivating narrative and thought provoking insights this book will challenge your assumptions about reality and leave you with a deeper understanding of the profound mystery that lies at the heart of human existence If you like this book write a review [Breaking Boundaries](#) Katherine Janice Murray, 2011 Based on providing visual representation of all functions and key pieces of content What You See Is What You Get WYSIWYG is the current interface design paradigm primarily used in personal computing machines As we move into a world where computing power continues to increase and we choose to decrease the physical size of our machines so that they will fit into our pockets WYSIWYG will break This research agenda explores a paradigm shift asking whether users of computing machines can effectively complete tasks without this reliance on visual representation of all functions and information The two experiments described in this dissertation seek to answer these questions 1 do visual cues of information and function continue to be required by users in order to complete tasks using mobile devices 2 are users moving beyond a reliance on recall and recognition memory in human computer interaction Furthermore if these experiments are successful in showing that users no longer need to rely on visual cues in ways similar to the WYSIWYG interactions can we then describe human mobile interaction within a memory framework beyond standard recall and recognition We built two distinct task based protocols in which participants were asked to work through multi step tasks enacting functions and locating pieces of information that we described as being located outside of the physical space of the screen These functions and pieces of information were not visually represented on the screen Rather the participants were primed to understand that the functions and information existed in this non visual form and could be enacted through particular interaction techniques that referenced the particular specific space outside of the screen where these items lived In the two experiments participants worked through tasks either in a WYSIWYG or in a YUMYS paradigm We took a series of behavioral measurements including time on task total number of interactions between the user and the machine in order to complete the task and successful correct completion of the tasks The outcome of this research agenda indicate that the YUMYS

interface paradigm will provide a better design framework for mobile designers that will allow mobile users to perceive a decreased workload and increased success as they complete tasks within a YUMYS interface

**Pattern Making, Pattern Breaking** Ann Alder,2016-05-13 Rapid changes in technology the nature of organisations non traditional career progression globalisation and virtual worlds mean that we need to become ever more effective learners in order to keep pace with the demands placed upon us Our patterns of understanding the ways in which we make sense of our work and our world hardly become fixed before we are asked to change them and form new ones The ability to build patterns is fundamental to our ability to learn Ann Alder s Pattern Making Pattern Breaking explores the ways in which educators and facilitators can work to help students build those patterns that will be most useful to them These may be technical patterns of language number sequence or process They may be thinking patterns that support problem solving creativity logical analysis

or empathy They may be patterns of behaviour that demonstrate trust influence or integrity in relationships Ann also illustrates how you can teach students to break patterns to help them move on in the learning process by recognising and rejecting long held patterns of behaviour or assumptions that are unhelpful or redundant Formal education and training do not necessarily produce learners who are well resourced to take advantage of opportunities that arise and to avoid some of the stresses that uncertainty ambiguity or imposed change place upon them So perhaps one of the most important patterns that we can explore and understand as we move forward in a changing world is our own pattern of learning Whether you are a parent teacher tutor trainer coach or manager you need to be an effective facilitator of learning and this book is the perfect starting place
