## **Making Models:**

**Breaking and Making Models** Christoph F. E. Holzhey ,Marietta Kesting,Claudia Peppel,2025-05-20 Practically anything can be a model of or for something else What characterizes models is rather their specific reductive relationality which often promotes understanding but is always generative rather than merely representational The essays in *Breaking and Making Models* engage with the normative and performative qualities of models their aesthetic and political dimensions and their world making potentials Bringing such perspectives into a broad interdisciplinary dialogue this book explores ways to work creatively with models

**Decision-Making Models** Tofigh Allahviranloo,Witold Pedrycz,Amir Seyyedabbasi,2024-07-24 *Decision Making Models A Perspective of Fuzzy Logic and Machine Learning* presents the latest developments in the field of uncertain mathematics and decision science The book aims to deliver a systematic exposure to soft computing techniques in fuzzy mathematics as well as artificial intelligence in the context of real life problems and is designed to address recent techniques to solving uncertain problems encountered specifically in decision sciences Researchers professors software engineers and graduate students working in the fields of applied mathematics software engineering and artificial intelligence will find this book useful to acquire a solid foundation in fuzzy logic and fuzzy systems optimization problems and artificial intelligence practices as well as how to analyze IoT solutions with applications and develop decision making mechanisms realized under uncertainty Introduces mathematics of intelligent systems which provides the usage of mathematical rigor such as precise definitions theorems results and proofs Provides extended and new comprehensive methods which can be used efficiently in a fuzzy environment as well as optimization problems and related fields Covers applications and elaborates on the usage of the developed methodology in various fields of industry such as software technologies biomedicine image processing and communications

*Human-Centric Decision-Making Models for Social Sciences* Peijun Guo,Witold Pedrycz,2013-11-01 The volume delivers a wealth of effective methods to deal with various types of uncertainty inherently existing in human centric decision problems It elaborates on comprehensive decision frameworks to handle different decision scenarios which help use effectively the explicit and tacit knowledge and intuition model perceptions and preferences in a more human oriented style The book presents original approaches and delivers new results on fundamentals and applications related to human centered decision making approaches to business economics and social systems Individual chapters cover multi criteria multiattribute decision making decision making with prospect theory decision making with incomplete probabilistic information granular models of decision making and decision making realized with the use of non additive measures New emerging decision theories being presented as along with a wide spectrum of ongoing research make the book valuable to all interested in the field of advanced decision making The volume self contained in its nature offers a systematic exposure to the concepts design methodologies and detailed algorithms A prudent balance between the theoretical studies and applications makes the material suitable for researchers and graduate students in

information computer sciences psychology cognitive science economics system engineering operation research and management science risk management public and social policy

**Decision-Making Models and Applications in Manufacturing Environments** Pushpdant Jain, Kumar Abhishek, Prasenjit Chatterjee, 2024-02-20 Multi criteria decision making MCDM has gained vast popularity for its ability to help make decisions in the presence of various similar and conflicting choices This new volume applies the MCDM theory to solving problems and challenges in manufacturing environments It discusses using MCDM computational methods to evaluate and select the most optimal solution or method for real world real time manufacturing engineering issues It details the decision making process in relation materials selection identification assessment and evaluation of risk sustainability assessment selection of green suppliers and more The chapter authors demonstrate the application of myriad MCDM techniques in decision making including MADM multiple attribute decision making DEA data envelopment analysis fuzzy TOPSIS technique for order preference by similarities to ideal solution fuzzy VIKOR multicriteria optimization and compromise solution MOORA multi objective optimization on the basis of ratio analysis EWM entropy weight method AHP analytic hierarchy process TODIM TOMada de Decisao Interativa Multicriterio and others The volume illustrates these MCDM models in several industries and industrial processes including for experimental analysis and optimization of drilling of glass fiber reinforced plastic in the textile industries for selection of refrigerants for domestic applications and others

*Big Data Analytics Using Multiple Criteria Decision-Making Models* Ramakrishnan Ramanathan, Muthu Mathirajan, A. Ravi Ravindran, 2017-07-12 Multiple Criteria Decision Making MCDM is a subfield of Operations Research dealing with decision making problems A decision making problem is characterized by the need to choose one or a few among a number of alternatives The field of MCDM assumes special importance in this era of Big Data and Business Analytics In this volume the focus will be on modelling based tools for Business Analytics BA with exclusive focus on the sub field of MCDM within the domain of operations research The book will include an Introduction to Big Data and Business Analytics and challenges and opportunities for developing MCDM models in the era of Big Data

**Intelligent Decision-making Models for Production and Retail Operations** Zhaoxia Guo, 2016-06-27 This book provides an overview of intelligent decision making techniques and discusses their application in production and retail operations Manufacturing and retail enterprises have stringent standards for using advanced and reliable techniques to improve decision making processes since these processes have significant effects on the performance of relevant operations and the entire supply chain In recent years researchers have been increasingly focusing attention on using intelligent techniques to solve various decision making problems The opening chapters provide an introduction to several commonly used intelligent techniques such as genetic algorithm harmony search neural network and extreme learning machine The book then explores the use of these techniques for handling various production and retail decision making problems such as production planning and scheduling assembly line balancing and sales forecasting

**Models in Intergovernmental Organizations: A Poliheuristic Approach to Political Regime Type Influence** Timothy Tamutana Tamunang, 2021-03-15 Until recently Political Psychology of International Relations has attracted very few scholars attention in explaining states behaviors and attitudes as a juridical person In reality international relations scholarly works especially related to Intergovernmental organizations have shown that rational structural and functional accounts have failed to fully capture the underline nature of these institutions A poliheuristic approach doesn t only solve these theoretical shortcomings but also allows for the close examination of states attitudes and behaviors in making choices that would serve as tools for expected interests This gives a chance to retrospect how were these bodies created what were the environmental factors that led to their formations and the nature of founders Since organizations are adepts of metamorphosis it is interesting to watch their overall changes This book present not only the existing views within the subject but also provides additional information which the author has proven to be relevant DECISION MAKING STYLE: Social and Creative Dimensions DEV VERMA, 2009-12 As a leader or responsible person we often stuck with decision making It s our job to make decisions that are in the best interest of the whole organisation or to ourselves We must consider the good of many not of a few This is a big responsibility and very often people don t appreciate our efforts In fact many times people get angry at us because of the decisions we make to help them In this book we discuss decision making style Not the decision itself but style We hope that readers will appreciate this effort **Progress in Multicriteria Decision Making Models** Jayanta Das, Somenath Halder, 2025-06-14 This book offers a comprehensive exploration of Multicriteria Decision Making MCDM models presenting a novel approach to hazard monitoring that enhances decision making Using advanced GIS techniques and integrating both subjective and objective models this volume addresses the complex interdependencies of various risk factors The chapters here explore how MCDM methods can be effectively applied to assess and manage risks associated with natural disasters and other hazards They highlight various MCDM methodologies such as the Analytic Hierarchy Process AHP Technique for Order of Preference by Similarity to Ideal Solution TOPSIS and Multi Attribute Utility Theory MAUT each offering unique approaches to complex decision problems The significance of these methods lies in their ability to accommodate diverse preferences and handle uncertainties that are inherent in the monitoring and management of hazards One of the central themes of the book is the holistic approach to hazard monitoring This approach integrates various factors including hazard severity the vulnerability of assets and the likelihood of occurrence economic implications and societal impacts into a cohesive framework This enables stakeholders to achieve a comprehensive understanding of hazards and their potential effects facilitating more informed and robust decision making By showcasing applications across different domains such as disaster management environmental risk assessment urban planning and infrastructure development the book demonstrates the practical utility of MCDM in real world settings Each chapter provides detailed case studies and comparative analyses that illustrate how these methodologies can be applied to optimize hazard monitoring and risk

assessment This book is useful to academic researchers and students in the fields of geography environmental science and disaster management as well as professionals and policymakers involved in hazard assessment and mitigation It serves as an essential resource for anyone looking to enhance their understanding of multicriteria decision making processes and their application in the context of hazard monitoring and risk management

**Clinical Decision Making in Complementary and Alternative Medicine** Matthew Leach,2010 Clinical Decision Making in Complementary and amp Alternative Medicine differs from other medical texts by introducing a systematic clinical framework for the practice of complementary and alternative medicine While comparable titles may explore the use or efficacy of specific complementary and alternative medicine interventions this indispensable textbook highlights evidence based interventions while helping practitioners apply them within a clinical decision making framework Clinical Decision Making in Complementary and amp Alternative Medicine is a one of a kind health reference for clinicians stu

The Unaffordable Price of Static Decision-making Models Fouad El Ouardighi,Gustav Feichtinger,2025-07-01 At the 15th Viennese Workshop on Optimal Control and Dynamic Games held in July 2022 experts in economics and the management sciences identified a concerning trend static decision making models while less effective than dynamic ones are becoming increasingly prevalent This book aims to address the economic and social costs associated with reliance on static models and to demonstrate the advantages of applying dynamic approaches Static models may be easier to formulate but they often overlook the long term consequences of decisions promoting myopic practices that can lead to poor outcomes In contrast dynamic models foster a more comprehensive perspective enabling foresight in decision making which is crucial for issues involving stock variables such as pollution reputation and inventory The book explores the limitations of static models including their inability to capture long term outcomes history dependent solutions and the impact of abrupt contextual changes It also highlights recent advances in dynamic modeling techniques that can enhance accuracy and help adapt to complex decision making environments By promoting the shift from static to dynamic models this book aspires to open new research opportunities and provide valuable insights for researchers students policymakers and managers in the fields of economics and the management sciences

**Behavioral Economics and Smart Decision-Making** Ankal Ahluwalia,2025-01-03 The illustrations in this book are created by Team Educohack Behavioral Economics and Smart Decision Making explores the modern approach to economics emphasizing the impact of psychology and human behavior We delve into various theories within this field including Prospect Theory measurement principles and heuristics and biases Our book also discusses how behavioral management modernizes traditional management practices Designed to enhance understanding this book is an essential resource for anyone interested in the intersection of economics and psychology

**Dynamics of decision making: from evidence to preference and belief** Erica Yu,David A. Lagnado,2014-10-24 At the core of the many debates

throughout cognitive science concerning how decisions are made are the processes governing the time course of preference formation and decision. From perceptual choices such as whether the signal on a radar screen indicates an enemy missile or a spot on a CT scan indicates a tumor to cognitive value based decisions such as selecting an agreeable flatmate or deciding the guilt of a defendant, significant and everyday decisions are dynamic over time. Phenomena such as decoy effects, preference reversals and order effects are still puzzling researchers. For example, in a legal context, jurors receive discrete pieces of evidence in sequence and must integrate these pieces together to reach a singular verdict. From a standard Bayesian viewpoint, the order in which people receive the evidence should not influence their final decision, and yet order effects seem a robust empirical phenomenon in many decision contexts. Current research on how decisions unfold, especially in a dynamic environment, is advancing our theoretical understanding of decision making. This Research Topic aims to review and further explore the time course of a decision, from how prior beliefs are formed to how those beliefs are used and updated over time towards the formation of preferences and choices and post decision processes and effects. Research literatures encompassing varied approaches to the time scale of decisions will be brought into scope: a) Speeded decisions and post decision processes that require the accumulation of noisy and possibly non stationary perceptual evidence e.g. randomly moving dots stimuli within a few seconds with or without temporal uncertainty; b) Temporally extended value based decisions that integrate feedback values e.g. gambling machines and internally generated decision criteria e.g. when one switches attention selectively between the various aspects of several choice alternatives; c) Temporally extended belief based decisions that build on the integration of evidence which interacts with the decision maker's belief system towards the updating of the beliefs and the formation of judgments and preferences as in the legal context. Research that emphasizes theoretical concerns including optimality analysis and mechanisms underlying the decision process, both neural and cognitive, is presented as well as research that combines experimental and computational levels of analysis.

Qualitative Investment Decision-Making Methods under Hesitant Fuzzy Environments Wei Zhou, Zeshui Xu, 2019-03-22. This book describes five qualitative investment decision making methods based on the hesitant fuzzy information. They are: 1) the investment decision making method based on the asymmetric hesitant fuzzy sigmoid preference relations; 2) the investment decision making method based on the hesitant fuzzy trade off and portfolio selection; 3) the investment decision making method based on the hesitant fuzzy preference envelopment analysis; 4) the investment decision making method based on the hesitant fuzzy peer evaluation and strategy fusion; and 5) the investment decision making method based on the EHVaR measurement and tail analysis.

**Twenty-one Mental Models That Can Change Policing** Renée J. Mitchell, 2021-09-16. This book goes beyond other police leadership books to teach practitioners how to think about policing in a structured way that synthesizes criminological theory, statistics, research design, applied research, and what works and what doesn't in policing into Mental Models. A Mental Model is a representation of how something works. Using a Mental Model framework to simplify complex

concepts readers will take away an in depth understanding of how cognitive biases affect our ability to understand and interpret data what empirical research says about effective police interventions how statistical data should be structured for management meetings and how to evaluate interventions for efficiency and effectiveness While evidence based practice is critical to advancing the police profession it is limited in scope and is only part of what is necessary to support sustainable change in policing Policing requires a scientifically based framework to understand and interpret data in a way that minimizes cognitive bias to allow for better responses to complex problems Data and research have advanced so rapidly in the last several decades that it is difficult for even the most ambitious of police leaders to keep pace The Twenty one Mental Models were synthesized to create a framework for any police public or community leader to better understand how cognitive bias contributes to misunderstanding data and gives the reader the tools to overcome those biases to better serve their communities The book is intended for a wide range of audiences including law enforcement and community leaders scholars and policy experts who specialize in policing students of criminal justice organizations and management reporters and journalists individuals who aspire to police careers and citizen consumers of information about policing Anyone who is going to make decisions about their communities based on data has a responsibility to be numerate and this book Twenty one Mental Models That Can Change Policing A Framework For Using Data and Research For Overcoming Cognitive Bias will help you become just that     Wonderful Models Percival Marshall,1928     **Ethical Practice in Social Work** Michael Collingridge,Steven Curry,2020-07-17 This innovative text shows why ethics is so important for social work practice that it is not simply a way of defining and understanding what is good in practice but is a means by which social work and other caring professions can actually achieve good practice Professor Richard Hugman University of NSW This book integrates ethical theory and political philosophy into a clear yet challenging framework for ethical action in social work Firmly grounded in practice examples it will be of great interest both to students and practitioners in the field Professor Sarah Banks Durham University In an increasingly fragmented and regulated world the authors of Ethical Practice in Social Work argue that social work has become detached from its ethical roots Their aim is to reinstate ethics as the driving force of good social work and welfare practice Ethical Practice in Social Work provides the tools to develop essential ethical decision making and problem solving skills Taking an applied approach with case studies in each chapter the authors demonstrate how ethical principles can be used to transform practice into an effective inclusive and empowering process for both professionals and their clients They discuss the ethical principles social workers have traditionally adhered to the role of the good social worker in the contemporary context professionalism and the way in which ethics can be used to reconcile the often differing demands of employers community groups clients the profession and their own personal values Ethical Practice in Social Work is a valuable professional reference and student text     Optimization Models Using Fuzzy Sets and Possibility Theory J. Kacprzyk,S.A. Orlovski,2013-11-11 Optimization is of central concern to a number of discip lines Operations Research and

Decision Theory are often considered to be identical with optimization. But also in other areas such as engineering design, regional policy, logistics and many others, the search for optimal solutions is one of the prime goals. The methods and models which have been used over the last decades in these areas have primarily been hard or crisp, i.e. the solutions were considered to be either feasible or unfeasible, either above a certain aspiration level or below. This dichotomous structure of methods very often forced the modeller to approximate real problem situations of the more or less type by yes or no type models, the solutions of which might turn out not to be the solutions to the real problems. This is particularly true if the problem under consideration includes vaguely defined relationships, human evaluations, uncertainty due to inconsistent or incomplete evidence if natural language has to be modelled or if state variables can only be described approximately. Until recently, everything which was not known with certainty, i.e. which was not known to be either true or false or which was not known to either happen with certainty or to be impossible to occur, was modelled by means of probabilities. This holds in particular for uncertainties concerning the occurrence of events.

*Ethical Decision Making for the 21st Century Counselor*  
Donna S. Sheperis, Stacy L. Henning, Michael M. Kocet, 2015-09-16

Ethical practice is an essential aspect of counselor training. In order for counselors to competently work with clients, they must be well versed in ethical codes, ethical decision making, and legal issues impacting the profession. *Ethical Decision Making for the 21st Century Counselor* provides the fundamentals of ethical practice with emphasis on ethical decision making and is structured to facilitate the development of these skills. Authors Donna S. Sheperis, Stacy L. Henning, and Michael M. Kocet move the reader through a developmental process of understanding and applying ethical decision making. Individuals will be able to incorporate ethical practice into their understanding of the counseling process and integrate ethical decision making models into their counseling practice. This unique approach differs from existing texts because of its strong emphasis on practical decision making and focus on understanding the process of applying a standard ethical decision model to any ethical scenario. Students build a foundation in how to evaluate an ethical situation and feel confident that they have applied a set of decision models to reach the best decision.

### **Making Models Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Making Models has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Making Models has opened up a world of possibilities. Downloading Making Models provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Making Models has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Making Models. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Making Models. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Making Models, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Making Models has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it

is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
