The CG Story
Christopher Finch,2013-12-03 The Art of Walt Disney author Christopher Finch tells the story of the pioneers of CG films producer directors like George Lucas Steven Spielberg and Ridley Scott and John Lasseter and Ed Catmull founders of Pixar

Computer generated imagery commonly called CG has had as big an impact on the movie industry as the advent of sound or color. Not only has it made possible a new kind of fully animated movie but it also has revolutionized big budget live action filmmaking. The CG Story is one of determined experimentation and brilliant innovation carried out by a group of gifted colorful and competitive young men and women many of whom would become legendary in the digital world. George Lucas, Steven Spielberg and Ridley Scott embraced the computer to create believable fantasy worlds of a richness that had seldom if ever been realized on screen. Their early efforts helped inspire a revolution in animation enabled by technical wizardry and led by the founders of Pixar including John Lasseter and Ed Catmull who would create the entirely computer produced worlds of Toy Story and subsequent Pixar films. Meanwhile directors like James Cameron used the new technology to make hybrid live action and CG films including the extraordinary Avatar. Finch covers these and more giving a full account of today's most significant CG films.
