Transformation Management Ronnie Lessem,Alexander Schieffer,2016-02-17 The concept of transformation has long been known to the sciences and has been around in the popular vocabulary for several decades Because it has never been fully developed as a managed process and applied to our organizations the way in which we have been trying to deal with the complex issues we face today is looking increasingly inadequate Transformation management argue the authors of this inspirational book now provides the opportunity for the application of the first significant world wide innovation in the way we manage since Drucker put management itself on the map in the 1950s In a book that draws on seminal theses and practical examples from the four corners of the world Ronnie Lessem and Alexander Schieffer provide leaders students of leadership managers and change agents with a trans culturally tested integrated approach to leadership and management Only through a redefinition of what leadership management and entrepreneurship amount to say the authors can organizations be transformed into sustainable enterprises capable of dealing with the burning issues of our time Leaders are coming to realise that it is no longer possible for organizations to operate in any sort of isolation from the society and the wider world in which they exist but paying lip service to notions of either social responsibility or globality is not good enough From this indispensable book those whose enterprises are to have any hope of becoming authentically socially responsible or authentically global will learn to understand and activate the process that dynamically links any organization with the society in which it is embedded and that links the local with the global The practice of transformation management is about creating real value for organizations people and society This book from the Transformation and Innovation Series makes that practice possible *Managing Health Services* M. G. Harris,Mary G. Harris,2006 *Managing Health Services Concepts and Practice* 2nd edition provides a valuable practice resource for health service management students and managers While new concepts and strategies of multidisciplinary health service management and leadership have been added the focus remains on

providing comprehensive coverage of management topics and issues faced by health services managers **Spirituality, Leadership and Management, Seventh National Conference Proceedings** Spirituality, Leadership and Management. National conference proceedings, 2011 **Integral Community** Ronnie Lessem, Paul Chidara Muchineripi, 2016-05-23

Integral Community moves the transformation journey for enterprises and society on from the stages covered in earlier books in Gower's Transformation and Innovation Series which describe a new macro economic framework and which have examined alternative development with different local communities bringing wide cultural perspectives to practical implementation of authentic or integral development. Here the authors argue that there are two major fields of force prevailing in today's world. The one reflects our common heritage whereby East and West North and South are coming ever closer together the global commons. The other reflects local and national singularity where the notion of feeding off ancient local heritage and talent is key. They also identify four different culturally laden worldviews as Southern humanistic Eastern holistic Northern rational and Western pragmatic. The enterprise and social innovation in Africa with which Lessem's co authors are involved provides an object lesson in the sort of differentiation and integration needed in order to operate socio economically with local identity and global integrity. It provides in this case a Southern worldview background against which to examine communally based self sufficiency culturally based developmental economy knowledge based social economy and finally the move towards what the authors describe as a living economy. All illustrated through a rural case Chinyika with which they have been intimately involved whereby 100 000 have become self sufficient over the past five years. Integral Community should be read by academics and students of business economics development studies and agriculture and by policy makers particularly those concerned with the developing world in general and Africa in particular.
