Multicultural Gender Word Usage:

Multicultural/Gender Word Usage Augusta Edythe Hughes-Grant, 2000 The old adage Sticks and stones will break my bones but words will never hurt me is not true Words can wound as surely as a handgun We live in a sea of words from the time we awake in the morning until we go to bed at night Even during the night sleep may be made fretful by previous experiences clothed in haunting words Later words are used in an attempt to give meaning to our dreams and nightmares But little serious thought is given to the words we use and hear This search for more understanding of the power of words was prompted by a brief document addressed to the media that I discovered buried in my files The information in this document has been included in this book that has expanded the concept The document's premise is that certain words used in a multicultural context should either be used or avoided It focuses on the words we use in human relations the words we use to identify different people the words we use to express our opinions about different people and the words that perpetuate the stereotypes about different people The words in the document have been expanded by adding words found in two standard dictionaries Dictionaries give us access to the words used and accepted by a society This premise has been placed in the more expansive understanding of language as one aspect of the diverse cultures that exist throughout the world It suggests that the words we use reveals what we think about people who are different and that words are powerful in shaping our beliefs attitudes and prejudices According to one source there are 6500 spoken languages in the world Scant information is sprinkled throughout this book about the dialects subfamilies and families of some of these diverse languages Geographical locations have been identified to broaden our scope of the many pockets of diverse cultures found around the world All have developed their own languages and customs which in turn have influenced their perception of reality The names of persons who have made significant contributions to the culture found in the United States are listed to enable us to recognize the diversity in cultural backgrounds and nationalities These contributions come from varied fields of endeavor and are significant enough to be included in a dictionary A most important contribution to the understanding of language and its role in human relations has been made by the inclusion of excerpts from Professor S I Hayakawa's book LANGUAGE IN ACTION This book was published in 1939 and is no longer in print At the time the book was published Professor Hayakawa was Assistant Professor of English at the Illinois Institute of Technology These excerpts arbitrarily selected provide an introduction to the importance of language and how it is used for political purposes Professor Hayakawa was not only an authority on languages but was also a member of a minority group that has experienced racism I have concluded that one clue to understanding the world of diversity in which we live is in the spelling of the words included in this dictionary The varied combination of letters in these words leaves one feeling that the words are strange and that we are unsure about their pronunciation And with the different combination of letters there are different vocal sounds suggesting that the language has also changed The fact is more evident that not many groups who are different including the model group have escaped

derogatory names Many of the definitions of a group are most unkind and express the hatred and hostility felt toward the group Some words that society has found most objectionable have been deleted from dictionaries Perhaps an effort should be made to have some of the words we find in this dictionary

Multiculturalism on Campus Michael J. Cuyjet, Diane L. Cooper, Mary F. Multiculturalism in the College Curriculum Marilyn Lutzker, 1995-03-18 Emphasizing that diversity in the curriculum is as much about a way of thinking as it is about specific information Lutzker presents a compendium of innovative and practical classroom strategies and widely available information resources which will enable faculty to increase the multicultural content of their courses without necessarily making major changes in their accustomed methods of teaching This is a handbook for college faculty in all disciplines who would like to increase the multicultural content of their courses but have been reluctant to do so for a variety of reasons including an already overloaded syllabus a lack of background in the subject uncertainty about student reactions or lack of time to make substantial changes in an existing syllabus Administrators

anxious to increase diversity in the curriculum of their institutions but unable to fund large scale curriculum revision projects will also find this volume useful Part I is concerned with classroom strategies and with student research projects Starting with discussions of objectives and priorities the underlying role of critical thinking and the importance of language sensitivity the book then describes specific classroom strategies useful for increasing diversity The subsequent chapters are devoted to discussions of general guidelines for developing student projects with a multicultural perspective innovative alternatives to the traditional term paper and suggestions for multicultural student projects which do not require library research Part I concludes with a discussion of possible student reactions to increased multiculturalism and suggested approaches to those reactions Part II is concerned with information resources which will be useful to instructors and to students Fully annotated lists are provided in a variety of areas including widely available primary sources specialized biographical directories sources for sample syllabi in all disciplines guides to ethnic and foreign press to films and videos and to electronic resources Part II concludes with a discussion designed to increase efficiency in using the library catalog to locate information in multicultural subject areas Appendices provide sample research worksheets a list of small publishers and distributors of multicultural books and an annotated bibliography

Analysing Design Thinking: Studies of Cross-Cultural Co-Creation Bo Christensen, Linden J. Ball, Kim Halskov, 2017-08-03 The scientific analysis of design thinking continues to burgeon and is of considerable interest to academic scholars and design practitioners across many disciplines This research tradition has generated a growing corpus of studies concerning how designers think during the creation of innovative products although less focus has been given to analysing how designers think when creating less tangible deliverables such as concepts and user insights *Analysing Design Thinking: Studies of Cross Cultural Co Creation* brings together 28 contributions from internationally leading academics with a shared interest in design thinking who take a close look at professional designers working on a project that not only involves soft deliverables but where a central role is played by co creation across multiple culturally diverse stakeholders This collection of detailed multi method analyses gives a unique insight into how a Scandinavian design team tackled a specific design task within the automotive industry over a four month design process All papers draw upon a common video based dataset and report analyses that link together a diversity of academic disciplines including psychology anthropology linguistics philosophy architecture management engineering and design studies The dataset affords multiple entry points into the analysis of design thinking with the selected papers demonstrating the application of a wide range of analytic techniques that generate distinct yet complementary insights Collectively these papers provide a coherent framework for analysing and interpreting design thinking in vivo through video based field studies
