explore their responses to pictorial art as individuals and thereby gain new understandings of related transference and countertransference issues with clients Chapter four provides clear instructions for administering mother and child drawings as a projective technique and guidelines for their interpretation This section provides samples and analyses of age typical drawings from the general population They vary greatly in style and artistic proficiency and are included to provide an idea of the usual developmental sequence of drawing characteristics from early childhood through the adult years Drawings of groups with demonstrated psychological pathologies or physical and developmental abnormalities comprise the final chapter This section approaches the interpretation of drawings by asking questions about how they communicate basic self and object relations issues This commanding volume of interest to students and professionals alike will provide art therapists school psychologists and mental health practitioners of all stripes with a powerful new projective technique to add to their professional armamentarium
