Gene Manipulations in Fungi combines a review of classical fungal genetics contemporary research and responsible speculation about the future This book focuses on yeasts and molds because yeast is the primary model system for eukaryotes and that there is an elegant research on molds The applications of fungi including their economic importance are addressed The book emphasizes the need for improved transformation systems appropriate vectors and broadly applicable selectable markers in this field of interest This book will help stimulate the development of innovative approaches in this subject matter *Genetics of Plant Pathogenic Fungi* G.S. Sidhu,2016-07-23 Approx 566 pages **Mycorrhiza** Ajit Varma,Bertold Hock,2013-03-09 The second edition of Mycorrhiza falls into a time period of exceptionally rapid growth in mycorrhizal research Therefore the editors have been most pleased with the decision of the Springer Verlag to revise the first edition and to incorporate the remarkable advances experienced in the mycorrhizal field The pace of discovery has been particularly fast at the two poles of biological complexity the molecular events leading to changes in growth and differentiation as well as the factors regulating the structure and diversity of natural populations and communities Therefore the most significant changes introduced in the new edition of this book are found within these topics Not only were many chapters updated but also new chapters have replaced existing ones The individual decisions have not been easy since valuable contributions had to be sacrificed in favour of new aspects but the authors hope that a highly topical new edition will be of greatest benefit for a rapidly expanding field of research We welcome comments and critics from readers Since it was possible again to find leading scientists as contributors we are confident that this revised second edition will stimulate further progress and contribute to a deeper understanding of advances in the mycorrhizal field We are grateful to the Springer Verlag especially Dr Dieter Czeschlik for his continued interest and active help Dr Maja Hilber Bodmer and Dr
