Myth Of Print Culture:

The Myth of Print Culture Joseph A. Dane, 2003-01-01 The Myth of Print Culture is a critique of bibliographical and editorial method focusing on the disparity between levels of material evidence unique and singular and levels of text abstract and reproducible It demonstrates how the particulars of evidence are manipulated in standard scholarly arguments by the higher levels of textuality they are intended to support The individual studies in the book focus on a range of problems basic definitions of what a book is statistical assumptions and editorial methods used to define and collate the presumably basic unit of variant This work differs from other recent studies in print culture in its emphasis on fifteenth century books and its insistence that the problems encountered in that historical milieu problems as basic as cataloguing errors are the same as problems encountered in other areas of literary criticism The difficulties in the simplest of cataloguing decisions argues Joseph Dane tend to repeat themselves at all levels of bibliographical editorial and literary history *The Perils of Print Culture: Book, Print and Publishing History in Theory and Practice* Jason McElligott, 2014-09-09 This collection of essays illustrates various pressures and concerns both practical and theoretical related to the study of print culture Procedural difficulties range from doubts about the reliability of digitized resources to concerns with the limiting parameters of national book history

Print Culture Frances Robertson, 2013 With the advent of new digital communication technologies the end of print culture once again appears to be as inevitable to some recent commentators as it did to Marshall McLuhan This book charts the elements involved in such claims through a method that examines the iconography of materials marks and processes of print and in this sense acknowledges McLuhan's notion of the medium as the bearer of meaning **Print Culture and the Medieval Author** Alexandra Gillespie, 2006-11-30 Print Culture and the Medieval Author is a book about books Examining hundreds of early printed books and their late medieval analogues Alexandra Gillespie writes a bibliographical history of the poet Geoffrey Chaucer and his follower John Lydgate in the century after the arrival of printing in England Her study is an important new contribution to the emerging sociology of the text in English literary and historical studies At the centre of this study is a familiar question what is an author The idea of the vernacular writer was already contested and unstable in medieval England Gillespie demonstrates that in the late Middle Ages it was also a way for book producers and readers to mediate the risks commercial political religious and imaginative involved in the publication of literary texts Gillespie's discussion focuses on the changes associated with the shift to print scribal precedents for these changes and contemporary understanding of them The treatment of texts associated with Chaucer and Lydgate is an index to the sometimes flexible sometimes resistant responses of book printers copyists decorators distributors patrons censors owners and readers to a gradual but profoundly influential bibliographical transition The research is conducted across somewhat intractable boundaries Gillespie writes about medieval and modern history about manuscript and print about canonical and marginal authors about literary works and books as objects In the process she finds new meanings for some

medieval vernacular texts and a new place for some old books in a history of English culture Print Culture, Agency, and Regionality in the Hand Press Period Rachel Stenner, Kaley Kramer, Adam James Smith, 2022-04-06 Print Culture Agency and Regionality in the Hand Press Period illuminates the diverse ways that people in the British regional print trades exerted their agency through interventions in regional and national politics as well as their civic commercial and cultural contributions Works printed in regional communities were a crucial part of developing narratives of local industrial technological and ideological progression By moving away from understanding of print cultures outside of London as provincial however this book argues for a new understanding of region as part of a network of places emphasising opportunities for collaboration and creation that demonstrate the key role of regions within larger communities extending from the nation to the emerging sense of globality in this period Through investigations of the men and women of the print trades outside of London this collection casts new light on the strategies of self representation evident in the work of regional print cultures as well as their contributions to individual regional identities and national narratives Mythodologies Joseph A. Dane, 2018 Mythodologies challenges the implied methodology in contemporary studies in the humanities We claim at times that we gather facts or what we will call evidence and from that form hypotheses and conclusions Of course we recognize that the sum total of evidence for any argument is beyond comprehension therefore we construct and we claim preliminary hypotheses perhaps to organize the chaos of evidence or perhaps simply to find it we might then see we claim whether that evidence challenges our tentative hypotheses Ideally we could work this way Yet the history of scholarship and our own practices suggest we do nothing of the kind Rather we work the way we teach our composition students to write choose or construct a thesis then invent the evidence to support it This book has three parts examining such methods and pseudo methods of invention in medieval studies bibliography and editing Part One Noster Chaucer looks at examples in Chaucer studies such as the notion that Chaucer wrote iambic pentameter and the definition of a canon in Chaucer Our Chaucer has it seems little to do with Chaucer himself and in constructing this entity Chaucerians are engaged largely in self validation of their own tradition Part Two Bibliography and Book History consists of three studies in the field of bibliography the recent rise in studies of annotations the implications of presumably neutral terminology in editing a case study in cataloguing Part Three Cacophonies A Bibliographical Rondo is a series of brief studies extending these critiques to other areas in the humanities It seems not to matter what we talk about meter book history the sex life of bonobos In all of these discussions we see the persistence of error the intractability of uncritical assumptions and the dominance of authority over evidence TABLE OF CONTENTS Part I Noster Chaucer Chap 1 How Many Chaucerians Does it Take to Count to Eleven The Meter of Kynaston s 1635 Translation of Troilus and Criseyde and its Implications for Chaucerian Metrics Chap 2 Chaucer s Rude Times Chap 3 Meditation on Our Chaucer and the History of the Canon Coda Godwin s Portrait of Chaucer Part II Bibliography and Book History Chap 4 The Singularities of Books and Reading Chap 5 Editorial Projecting Chap 6 The

 Dane, 2011-06-06 The new history of the book has constituted a vibrant academic field in recent years and theories of print
 culture have moved to the center of much scholarly discourse One might think typography would be a basic element in the
 construction of these theories yet if only we would pay careful attention to detail Joseph A Dane argues we would find
 something else entirely that a careful consideration of typography serves not as a material support to prevailing theories of
 print but rather as a recalcitrant counter voice to them In *Out of Sorts* Dane continues his examination of the ways in which
 the grand narratives of book history mask what we might actually learn by looking at books themselves He considers the
 differences between internal and external evidence for the nature of the type used by Gutenberg and the curious
 disconnection between the two and he explores how descriptions of typesetting devices from the seventeenth and eighteenth
 centuries have been projected back onto the fifteenth to make the earlier period not more accessible but less In subsequent
 chapters he considers topics that include the modern mythologies of so called gothic typefaces the presence of
 nontypographical elements in typographical form and the assumptions that underlie the electronic editions of a medieval
 poem or the visual representation of typographical history in nineteenth century studies of the subject Is Dane one of the
 most original or most traditional of historians of print In *Out of Sorts* he demonstrates that it may well be possible to be both
 things at once Myth and (mis)information Allan Ingram, Helen Williams, Clark Lawlor, 2024-06-25 This collection draws
 together original scholarship from international contributors on a range of aspects of professional and semi professional
 medical work and its relations to British culture It combines a diverse spectrum of scholarly approaches from medical history
 to book history exploring literary and scientific texts such as satiric poetry essays anatomies advertisements and the novel to
 shed light on the mythologisation and transmission of medical mis information through literature and popular culture It
 analyses the persuasive and sometimes deceptive means by which myths as well as information and beliefs about medicine
 and the medical professions proliferated in English literary culture of this period from early eighteenth century household
 remedies to the late nineteenth century concerns with vaccination that are still relevant today *Herculean Labours:*
Erasmus and the Editing of St. Jerome's Letters in the Renaissance Hilmar Pabel, 2008-07-31 The first monograph in English
 on Erasmus of Rotterdam as an editor of St Jerome this book belongs to the growing scholarship on the reception of the
 Church Fathers in early modern Europe Erasmus like other Renaissance humanists particularly admired Jerome d 419 or 420
 and he expressed his admiration most conspicuously in his edition of Jerome's letters Proclaiming his editorial Herculean
 labours Erasmus energetically promoted himself and his publication Erasmus self promotion cannot be reduced to a secular

appropriation of Jerome however A detailed examination of a variety of editorial interventions demonstrates Erasmus religious purpose his debt to previous editorial traditions as well as his editorial novelty and his influence on subsequent sixteenth century editions of Jerome

Jonathan Swift and Popular Culture Myth, Media and the Man A.

Kelly, 2016-04-30 Ann Kelly's provocative book breaks the mold of Swift studies Twentieth century Swift scholars have tended to assess Jonathan Swift as a pillar of the eighteenth century republic of letters a conservative even reactionary voice upholding classical values against the welling tide of popularization in literature Kelly looks at Swift instead as a practical exponent of the popular and impresario of the literary image She argues that Swift turned his back on the elite to write for a popular audience and that he annexed scandals to his fictionalized print alter ego creating a continual demand for works by or about this self-mythologized figure A fascinating look at print culture the commodification of the author and the history of popular culture this book should provoke lots of discussion
