reviews British industrial policy towards information technology within the context of the international trading system It argues that the incoherence of British policy stems from the clash between its core liberal ideology and its centralised political system and that unless Britain's traditional liberal ideology in trade policy was abandoned within this market Britain was set to become a mere technological dependency of America It discusses how the British government needed to develop effective non tariff barriers in the form of industrial policy to minimise the political and economic costs of technological dependence **Industrial Policies and Structural Change** Christopher Saunders, 2015-12-30

Policy and the Transformation of the Colonial Economy in Africa Horman Chitonge, 2021-02-15 Industrial Policy and the Transformation of the Colonial Economy in Africa offers an in depth analysis of the role industrial policy can play in the transformation of African economies Using examples from Zambia s industrial development experience this book illustrates that core features of the colonial economy have not just survived six decades of independence in most African countries but they have continued to shape the nature scope and pace of economic activities on the continent The book argues that since the colonial economy in Africa was not intended to serve the interests of Africans it is imperative that the structures and the underlying rationale of the colonial economy are radically reoriented if economic activities in Africa are to benefit the majority of Africans Drawing from the Zambian experience the book shows that the transformation of the colonial economy in Africa is urgently needed Whilst this has proved to be difficult over the past six decades it can be done The book outlines a specific type of industrial policy Frontier Industrial Policy as a key instrument for transforming the structure of African economies At a time when economic growth across Africa is under considerable pressure due to COVID 19 the insights in this book will be of interest to researchers across Economics Development Postcolonial Studies and African Studies **U.S.**
