understand the rationale and the costs associated with this policy stance Simply put FDI is not a condition sine qua non for development Too much emphasis has been placed on attracting FDI and not on understanding how to optimise the benefits for the host economy This volume aims to encourage and promote research related to these issues This volume was previously published as a special issue of the European Journal of Development Research *Economic Development Through World Trade* Yong-Shik Lee,2007 Increased participation in world trade is typically seen as the key to rapid economic growth and development Since this work examines trade and development from the point of view of developing countries it provides a rare opportunity to understand an **Research Handbook on Trade Law and Development** Sonia E. Saavedra-Rivano,A. Hosono,B. Stallings,2001-09-06 Regional integration seems to be thriving everywhere as the examples of the Association of South East Asian Nations ASEAN the North Atlantic Free Trade Area NAFTA and the Southern Common Market will illustrate More ambitious schemes such as Asian Pacific Economic Cooperation APEC and those for Western hemispheric integration are also underway How do these trends for integration relate to national development strategies The contributors to this volume provide new insights into these developments as well as assessing the prospects for further integration Sustainable Development As a Principle of International Law Christina Voigt,2009 This volume provides a framework for the doctrinal foundation of sustainable development as a principle of integration in international law The work departs from the fragmented nature of the international legal system a system that lacks integrative principles for creating coherent relations between for example the international trade regime of the WTO and multilateral environmental agreements The specific focus is on a legal analysis of potential normative conflicts between climate measures as regulated by the UNFCCC and the Kyoto Protocol in particular the flexibility instruments of international emissions trading and the Clean Development Mechanism and the rules of the WTO Attention is then given to

the application of sustainable development as a principle of integration in relation to these conflicts The book takes on several important timely and demanding tasks related to the urgent global challenge of climate change and the capacity of international law to deal with complex and multifaceted issues It addresses in particular a The relations between various international legal regimes especially between international trade law and climate law a The legal status of sustainable development as a principle of international law and a The analysis of interpretative methods and of principles that may serve to address conflicts between rules pertaining to different legal regimes Here integration as part of legal reasoning becomes particularly relevant
