Third World Health Theodore MacDonald, 2018-12-14 Great and increasing inequities exist between the peoples of the Third World and those of the First As well we find ourselves threatened by imminent environmental catastrophes largely as a result of trying to maintain such inequities This clear and straightforward text explains the complex origins of such bodies as the International Monetary Fund the World Bank and others and demonstrates the extent to which they exacerbate the problem The situation is now so grave that we can no longer afford the luxury of leaving it to the professionals We are all involved We find ourselves hearing daily news reports of wars starvation the HIV AIDS pandemic and natural disasters rendered worse by inadequate international responses The United Nations once seen as an effective arbiter and mediator in such matters now finds itself unable to exercise authority adequately Third World Health hostage to First World Wealth adopts a positive approach and puts forward various ways in which people at all levels can become more involved It addresses the pivotal issue of health in the Third World and argues that it is very much hostage to the globalization of trade by and for the benefit of

Andean States and the Resource Curse Gerardo Damonte, Bettina Schorr, 2021-12-02 This volume explores institutional change and performance in the resource rich Andean countries during the last resource boom and in the early post boom years. The latest global commodity boom has profoundly marked the face of the resource rich Andean region significantly contributing to economic growth and notable reductions of poverty and income inequality. The boom also constituted a period of important institutional change with these new institutions sharing the potential of preventing or mitigating the maladies extractive economies tend to suffer from generally denominated as the resource curse. This volume explores these institutional changes in the Andean region to identify the factors that have shaped their emergence and to assess their performance. The interdisciplinary and comparative perspective of the chapters in this book provide fine grained analyses of different new institutions introduced in the Andean countries and discusses their findings in the light of the resource curse approach. They argue that institutional change and performance depend upon a much larger set of factors than those generally identified by the resource curse literature. Different domestic and external economic political and cultural factors such as ideological positions of decision makers international pressure or informal practices have shaped institutional dynamics in the region. Altogether these findings emphasize the importance of nuanced and contextualized analysis to better understand institutional dynamics in the context of extractive economies. This book will be of great interest to students and scholars of the extractive industries natural resource management political economics Latin American studies and sustainable development.
