P. Telotte,2016-01-22 This book offers the first specific application in film studies of what is generally known as ecology theory shifting attention from history to the in this case media environment It takes the robot as its subject because it has attained a status that resonates not only with some of the key concerns of contemporary culture over the last

century but also with the very nature of film While the robot has given us a vehicle for exploring issues of gender race and a variety of forms of otherness and increasingly for asking questions about the very nature and meaning of life this image of an artificial being typically anthropomorphic also invariably implicates the cinema's own and quite fundamental artifice of the human Looking across genres across specific media forms and across closely linked conceptualizations Telotte sketches a context of interwoven influences and meanings The result is that this study of the cinematic robot while mainly focused on science fiction film also incorporates its appearance in for example musicals cartoons television advertising toys and literature

Predicting the Winner Ira Chinoy, 2024-05 Winner of the Ray Hiebert History of Journalism Published Work Award The history of American elections changed profoundly on the night of November 4 1952 An outside the box approach to predicting winners from early returns with new tools computers was launched live and untested on the newest medium for news television Like exhibits in a freak show computers were referred to as electronic brains and mechanical monsters Yet this innovation would help fuel an obsession with numbers as a way of understanding and shaping politics It would engender controversy down to our own time And it would herald a future in which the public square would go digital The gamble was fueled by a crisis of credibility stemming from faulty election night forecasts four years earlier in 1948 combined with a lackluster presentation of returns What transpired in 1952 is a complex tale of responses to innovation which Ira Chinoy makes understandable via a surprising history of election nights as venues for rolling out new technologies refining methods of prediction and providing opportunities for news organizations to shine In *Predicting the Winner* Chinoy tells in detail for the first time the story of the 1952 election night a night with continuing implications for the way forward from the dramatic events of 2020-21 and for future election nights in the United States

Monsters of Film, Fiction, and Fable Lisa Wenger Bro, Mary Ann Gareis, Crystal O'Leary-Davidson, 2018-07-27

Monsters are a part of every society and ours is no exception They are deeply embedded in our history our mythos and our culture However treating them as simply a facet of children s stories or escapist entertainment belittles their importance When examined closely we see that monsters have always represented the things we fear that which is different which we can t understand which is dangerous which is Other But in many ways monsters also represent our growing awareness of ourselves and our changing place in a continually shrinking world Contemporary portrayals of the monstrous often have less to do with what we fear in others than with what we fear about ourselves what we fear we might be capable of The nineteen essays in this volume explore the place and function of the monstrous in a variety of media stories and novels like Baum s Oz books or Gibson s Neuromancer television series and feature films like The Walking Dead or Edward Scissorhands and myths and legends like Beowulf and The Loch Ness Monster in order to provide a closer understanding of not just who we are and who we have been but also who we believe we can be for better or worse
