Robotics, Mechatronics, and Artificial Intelligence Newton C. Braga, 2002 Accessible to all readers including students of secondary school and amateur technology enthusiasts Robotics Mechatronics and Artificial Intelligence simplifies the process of finding basic circuits to perform simple tasks such as how to control a DC or step motor and provides instruction on creating moving robotic parts such as an eye or an ear Though many companies offer kits for project construction most experimenters want to design and build their own robots and other creatures specific to their needs and goals With this new book by Newton Braga hobbyists and experimenters around the world will be able to decide what skills they want to feature in a project and then choose the right building blocks to create the ideal results In the past few years the technology of robotics mechatronics and artificial intelligence has exploded leaving many people with the desire but not the means to build their own projects The author's fascination with and expertise in the exciting field of robotics is demonstrated by the range of simple to complex project blocks he provides which are designed to benefit both novice and experienced robotics enthusiasts The common components and technology featured in the project blocks are especially beneficial to readers who need practical solutions that can be implemented easily by their own hands without incorporating expensive complicated technology Accessible to technicians and hobbyists with many levels of experience and written to provide inexpensive and creative fun with robotics Appeals to all sorts of technology enthusiasts including those involved with electronics computers home automation mechanics and other areas

Improving Stability in Developing Nations through Automation 2006 Peter Kopacek, 2007-03-29 Technological development has caused profound changes and social stability Regions which have had stable populations for centuries have experienced enormous population growth leading to the emergence of sometimes unmanageable megaplex cities as well as bringing about macroscopic environmental change The scope of this IFAC SWIIS Conference is to offer insights into mitigating unwanted side effects of rapid development and to share methodologies for appropriate ways of managing the introduction of technologies which will alter social stability Contributions included in Improving Stability in Developing Nations through Automation 2006 cover a very broad field of interest for subjects such as social aspects of technology transfer managing the introduction of technological change ethical aspects technology and environmental stability and anticipating secondary and tertiary effects of technological development 3 survey papers 17 technical papers and a summary of the panel discussion Bringing together scientists and engineers working in these subjects to discuss solutions
