Longevity And Quality Of Life:

Longevity and Quality of Life Robert N. Butler, Claude Jasmin, 2012-12-06 Nations around the world are experiencing a spectacular increase in longevity. Society as a whole is being challenged by issues arising from this revolution in longevity. Although the specter of the loneliness and existential suffering of older citizens is such that some people under the age of 65 find it difficult to conceive of a long term future, persons over 85 have proven that aging does not necessarily preclude a healthy and productive life. Extraordinary progress in both curative and preventive medicine justifies optimism about the quality of life and state of well being that can be enjoyed even in great old age. We should look to professionals in diverse fields to develop creative solutions to the inevitable issues that will arise with aging. Governments must prepare for the future health of their citizens by making long term investments to educate all sectors of society in the value of good nutrition, exercise, and lifestyles that enhance well being throughout life. Also, governments should realize that the main cause of health care expenditure is serious illness which occurs in persons of all ages and not predominantly in older people. Early detection can help save lives as well. Health and longevity of life will ultimately end as a political issue. What is needed is long term government investments necessary for a viable health policy. The question arises: will world leaders be able to commit to such a policy? Two major socioeconomic phenomena may have a regulating effect on this issue. The first is the emergence of pressure groups that have come into being in response to a particular health issue such as AIDS. The second is the emergence of ethics committees in developed nations that deal solely with health issues.

Counseling Individuals Through the Lifespan Daniel W. Wong, Kimberly R. Hall, Cheryl A. Justice, Lucy Wong Hernandez, 2014-12-24 Organized around the latest CACREP Standards, *Counseling Individuals Through the Lifespan* introduces readers to the fundamentals of the counseling process during each stage of human development. Topics such as the client counselor relationship, counseling theory, research, and interventions are addressed with a focus on caring for the total person within his/her environment and culture. Emphasizing the importance of intentionality and self-reflection, the chapters include case illustrations and guided practice exercises to further the development of successful 21st century counselors. *Counseling Individuals Through the Lifespan* is part of the SAGE Counseling and Professional Identity Series, which targets specific competencies identified by the CACREP Council for Accreditation of Counseling and Related Programs. Essentials of Positive Psychology Dr. R. Sengamalam, Positive psychology is a branch of psychology that focuses on the positive aspects of human experience and behaviour, aiming to enhance well-being and promote flourishing. Traditional psychology has often focused on treating mental illness and dysfunction, whereas positive psychology emerged to provide a more holistic understanding of human nature by studying positive emotions, strengths, and virtues. As societies progress, there is an increasing recognition that measuring progress solely through economic indicators is insufficient. Positive psychology addresses the need to enhance overall life satisfaction and happiness. Positive psychology

aims to improve the quality of life by focusing on aspects such as happiness life satisfaction and the overall well being of individuals and communities By emphasizing positive emotions relationships and individual strengths positive psychology can contribute to preventing mental health issues and promoting resilience Positive psychology is not only about treating issues but also about optimizing human performance It explores how individuals and organizations can thrive and achieve their full potential Positive psychology is essential in the present scenario as it provides a comprehensive framework for understanding and enhancing the positive aspects of human life Its application extends to various domains contributing to individual well being organizational success and societal progress In order to realize the importance of this branch of psychology I made myself to contribute this small work by combining others thoughts and views through their conceptual understanding and a few studies in this area to some extent
