Martial Art:

Fighting for Honor M. Thomas J. Desch-Obi, 2008 Desch Obi explores a cultural continuity originating in Africa and that is as old as early slave settlements in South America and as contemporary as hip hop culture in this thorough survey of the history of African martial arts techniques He maps the translation of numerous physical combat techniques across three continents and several centuries to illustrate how these practices evolved over time and are still recognizable in American culture today Some of these art traditions were part of African military training while others were for self defense and personal discipline Desch Obi himself a practitioner of mgbá wrestling and engolo kick fighting also explores the spiritual dimensions of these combat arts Grounded in historical and cultural anthropological methodologies Desch Obi's investigation traces the influence of well delineated African traditions on long observed but misunderstood African and African American cultural activities in North America Brazil and the Caribbean He links the Brazilian martial art capoeira to reports of slave activities recorded in colonial and antebellum North America Likewise Desch Obi locates images of the African stick fighting techniques of kalenda in slave depictions His study takes on more modern subjects when he links movements from this same wellspring of traditions to break dancing and clown dancing techniques that have peppered urban culture in recent decades Throughout the study Desch Obi examines the ties between physical mastery of these arts and changing perceptions of honor

Is it really true that martial arts in spite of their popularity in this day and age of ours have at their deepest level the promised land of self knowledge the expression of beauty or something highly spiritual to be pursued for the human soul Or to put it in a different way what exactly makes martial arts so amazing that somehow they will eventually lead the practitioners to the spiritual realm of self cultivation in its highest depth Contrary to the conventional wisdom about martial arts as held by many over the ages this popular view about martial arts has become so legendary that their dark sides have yet to be systematically explored and that the lofty aims of martial arts are neither possible nor desirable to the extent that their proponents would like us to believe Of course this is not to say that the very tradition of martial arts is absolutely useless or that the literature on martial arts hitherto existing in history is spiritually unworthy to be appreciated Instead this book constructively offers an alternative better way to understand the nature of martial arts in special relation to the body and spirit of warriors while learning from different views in the literature without favoring any one of them nor integrating them as they are not necessarily compatible with each other and in the end transcending them towards a new horizon not conceived before This seminal view if proven valid will fundamentally change the legendary way that people have thought about martial arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate _____
