conservation issues referring to Australia's major owl species **Directory of Australian Birds: Passerines** R Schodde, IJ Mason, 1999-10-01 Recent classifications of Australian birds have been limited to lists of species which are inadequate as biodiversity indicators The Directory of Australian Birds Passerines fills a huge gap in ornithological knowledge by separating out and listing not only 340 species of song birds but also the 720 distinct regional forms Covering about half the national bird fauna the Directory provides science and the community with baseline information about what bird it is and where it lives in an Australia wide context Identity is taken down to the level of distinct regional population No other compendium on Australian birds does this *Finding Birds in Australia's Northern Territory* D Donato, P Wilkins, G Smith, L Alford, 1997-07-01 Birds are a prominent feature of the Northern Territory environment with almost half of Australia's bird species found there in spectacular landscapes ranging from deserts to tropics This guide will lead you to the Northern Territory's best birdwatching areas and help you find the birds It is designed to be used in conjunction with one of the Australian field identification guides The book has four main sections habitats areas special birds and a checklist The text does not discuss every bird likely to be found in every area instead it points out interesting species found at each site The special birds section covers birds considered to be special to the Northern Territory and includes tips on finding the birds and local identification hints Aboriginal Peoples and Birds in Australia Philip A. Clarke, 2023-04-03 Australia is home to many distinctive species of birds and Aboriginal peoples have developed close alliances with them over the millennia of their custodianship of this country *Aboriginal Peoples and Birds in Australia Historical and Cultural Relationships* provides a review of the broad physical historical and cultural relationships that Aboriginal people have had with the Australian avifauna This book aims to raise awareness of the alternative bodies of ornithological knowledge that reside outside of Western science It describes the role of birds as totemic ancestors and spirit beings and explores Aboriginal bird nomenclature foraging techniques and the use of avian materials to make food medicine and artefacts Through a historical perspective this book examines the gaps between knowledge systems of Indigenous peoples and Western science to encourage greater collaboration and acknowledgment in the future Cultural sensitivity Readers are warned that there may be words descriptions and terms used in this book that are culturally sensitive and which might not normally be used in certain public or community contexts While this information may not reflect current understanding it is provided by the author in a historical context This publication may also contain quotations terms and annotations that reflect the historical attitude of the original author or that of the period in which the item was written and may be considered inappropriate today Aboriginal and Torres Strait Islander peoples are advised that this publication may contain the names and images of people who have passed away *Nests and Eggs of Australian Birds* Archibald James Campbell, 1901 **CRC Handbook of Avian Body Masses** John B. Dunning, Jr., 1992-10-05 Body mass or weight is the most useful descriptive measure of relative body size in birds Masses are usually reported in avian studies of comparative ecology physiology breeding biology and zoology In

addition adult body mass is a vital statistic for studies of allometric relationships growth and development flight and biometrics The data in this handbook was compiled to provide a ready reference source for body masses of most of the world's species of birds Masses of over 5 800 species are presented representing about 65% of the known birds Information for each species includes when available the mean standard deviation range sample size collecting locale and season and original source Separate means are presented for males and females in sexually dimorphic species This handbook should greatly improve the ability of avian researchers to quickly locate body masses for most bird species and incorporate this data into research Airplane design engineers and airport management professionals can also use these data to calculate the damage done by various species of birds when they hit aircraft Avid birders members of birding organizations and bird banders will also find the book useful for their activities The Australian Bird Watcher ,2001 **Australian Predators of the Sky** Penny Olsen,2015-09-01 Australian predators of the sky are some of the most admired and the most despised of the bird world Raptors are admired for their strength and independence but despised for their depredations on livestock and favourite garden birds while the owls are at once respected for their wisdom and watchfulness and feared for their mournful cries and association with darkness and ill omen The book begins with fascinating descriptions by award winning natural history author Penny Olsen on the discovery and illustration of birds of prey in Australia and their characteristics and ecology followed by full colour illustrations of each species by a variety of artists accompanied by intriguing notes about the birds Australian Predators of the Sky comprises over 200 striking paintings lithographs and engravings of all 34 Australian species 25 diurnal birds of prey such as eagles hawks and falcons and nine owls such as hawk owls and barn owls **Systematics and Taxonomy of Australian Birds** Les Christidis,Walter E Boles,2008-01-25 Systematics and Taxonomy of Australian Birds presents an up to date classification of Australian birds Building on the authors 1994 book The Taxonomy and Species of Birds of Australia and its Territories it incorporates the extensive volume of relevant systematic work since then The findings of these studies are summarised and evaluated in the explanations for the taxonomic treatments adopted and with the extensive citations the book serves as a comprehensive introduction to the recent systematic literature of Australian birds All species of birds that have been recorded from the Australian mainland Tasmania island territories and surrounding waters are treated and listed Along with extant native species all accepted vagrants recently extinct since 1800 native species and established introduced species are included **The Action Plan for Australian Birds 2020** Stephen T. Garnett,G Barry Baker,2021-12 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia's avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many

decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland's tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019/20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated
