Thomas H. Picard

On The Surface Of Things:

On the Surface of Things Felice Frankel, 2007 *T. Lucreti Cari De Rerum Natura Libri Sex* Titus Lucretius Carus, 1898

Vital Lies Vernon Lee, 1912 **The Classical Weekly**, 1911 **Outside Belongings** Elspeth Probyn, 2015-12-22

Outside Belongings argues against a psychological depth model of identity one in which individuals possess an intrinsic quality that guarantees authentic belonging. Instead Probyn proposes a model of identity that takes into account the desires of individuals and groups of individuals to belong. The main ideas she considers the outside the surface and belonging allow her to articulate in concrete terms her precise concerns about sexuality and nationality. *Mother's Agenda: 1951-1960*

Mother, 1979. This prodigious document tape recorded by Satprem twice a week for more than fifteen years is the account of Mother's exploration in the body consciousness and of her discovery of a cellular mind capable of refashioning the nature of our bodies and the laws of the species as drastically as one day an infant thinking mind transformed the nature of the ape.

Symmetry as a Developmental Principle in Nature and Art Werner Hahn, 1998. Looking beyond the boundaries of various disciplines the author demonstrates that symmetry is a fascinating phenomenon which provides endless stimulation and challenges. He explains that it is possible to readapt art to the sciences and vice versa by means of an evolutionary concept of symmetry. Many pictorial examples are included to enable the reader to fully understand the issues discussed. Based on the artistic evidence that the author has collected he proposes that the new *ars evolutoria* can function as an example for the sciences. The book is divided into three distinct parts each one focusing on a special issue. In Part I the phenomenon of symmetry including its discovery and meaning is reviewed. The author looks closely at how Vitruvius, Polyclitus, Democritus, Plato, Aristotle, Plotinus, Augustine, Alberti, Leonardo da Vinci and Durer viewed symmetry. This is followed by an explanation on how the concept of symmetry developed. The author further discusses symmetry as it appears in art and science as well as in the modern age. Later he expounds the view of symmetry as an evolutionary concept which can lead to a new unity of science. In Part II he covers the points of contact between the form developing process in nature and art. He deals with biological questions in particular evolution. The collection of new and precise data on perception and knowledge with regard to the postulated reality of symmetry leads to further development of the evolutionary theory of symmetry. In Part III The author traces the enormous treasure of observations made in nature and culture back to a few underlying structural principles. He demonstrates symmetry as a far reaching leading structuring causal element of evolution as the idea lying behind nature and culture. Numerous controllable reproducible double mirror experiments on a new stereoscopic vision verify a symmetrization theory of perception. **The Play-book**, 1914 *Implementation of the Ports Access Demonstration Project Authorized by the Surface Transportation Assistance Act of 1982, and on Future Ports Access Needs* United States. Shiamin Kwa,2023-01-13 Analyzing the way that recent works of graphic narrative use the comics form to engage with the problem of reproduction Shiamin Kwa s Perfect Copies reminds us that the mode of production and the manner in which we perceive comics are often quite similar to the stories they tell Perfect Copies considers the dual notions of reproduction mechanical as well as biological and explores how comics are works of reproduction that embed questions about the nature of reproduction itself Through close readings of the comics My Favorite Thing Is Monsters by Emil Ferris The Black Project by Gareth Brookes The Generous Bosom series by Conor Stechschulte Sabrina by Nick Drnaso and Panther by Brecht Evens Perfect Copies shows how these comics makers push the limits of different ideas of reproduction in strikingly different ways Kwa suggests that reading and thinking about books like these that push us to engage with these complicated questions teaches us how to become better readers **The New American Church Monthly** ,1917 Includes section Book reviews
