Patient Interviewing The Human Dimension:

Patient Interviewing David E. Reiser, Andrea Klein Schroder, 1980 *Patient Interviewing*, 1982 **The Patient** Hoyle Leigh, 2013-03-08 The old fashioned doctor whose departure from the modern medical scene is so greatly lamented was amply aware of each patient's personality, family work and way of life. Today we often blame a doctor's absence of that awareness on moral or ethical deficiency either in medical education or in the character of people who become physicians. An alternative explanation however is that doctors are just as moral, ethical and concerned as ever before but that a vast amount of additional new information has won the competition for attention. The data available to the old fashioned doctor were a patient's history, physical examination and personal profile together with a limited number of generally ineffectual therapeutic agents. A doctor today deals with an enormous array of additional new information which comes from X-rays, biopsies, cytology, electrographic tracings and the phantasmagoria of contemporary laboratory tests and the doctor must also be aware of a list of therapeutic possibilities that are both far more effective and far more extensive than ever before.

Interviewing and Patient Care Allen Jay Enelow, Douglas L. Forde, Kenneth Brummel-Smith, 1996 This standard text on medical interviewing retains its core of open ended and more directed interviewing techniques but the Fourth Edition is more firmly anchored in the everyday practice of medicine. It contains much new material on the components of the medical history, interviewing cognitively impaired patients, interviewing children and their parents and the elderly, the interview in continuing care and when time is limited, delivering bad news and many other practical issues. *Introduction to Radiologic Sciences and Patient Care - E-Book* Arlene M. Evaluation of the Psychiatric Patient Seymour L. Halleck, 2013-11-09 A few months before the final manuscript of this book was sent to the publisher Dr Karl A Menninger died shortly before his ninety seventh birthday Thus when I sat down to write this preface he was very much on my mind I remembered that it had been almost forty years since he wrote A Manual for Psychiatric Case Study not one of his well known but probably the most practical of his books The psychoanalytically trained part of me began to wonder what had motivated me to write a book on a topic so similar to that which had earlier drawn the attention of my revered teacher There is no pressing need for another book on psychiatric evaluation furthermore evaluation is a very difficult subject to write about in a straightforward way Whatever my unconscious motivations may have been I hope they were less significant than those of which I was aware I wrote this book mainly as part of an effort to reverse certain trends in psychiatric education In the last decade psychiatrists have increasingly been trained in an environment that emphasizes brief evaluation of patients and deemphasizes teaching about the complexity of human behavior and experience Trainees no longer study psychiatric evaluation in a systematic manner They take fewer intensive histories fill out forms instead of describing the patient's mental status and with rare exceptions are not taught how to conceptualize biological and psychosocial interactions
