Patient-Centered Prescribing Jon Dowell, Brian Williams, David Snadden, 2007 Half of all prescribed medicines are used in a sub optimal manner and clinicians struggle to find ways of improving the situation This book offers real life case studies to demonstrate the way the patient centered model combined with other behavioural models can result in a logical approach to prescribing for difficult clients *Global Healing* Karen Laura Thornber, 2020-03-02 Read an interview with Karen Thornber In Global Healing Literature Advocacy Care Karen Laura Thornber analyzes how narratives from diverse communities globally engage with a broad variety of diseases and other serious health conditions and advocate for empathic compassionate and respectful care that facilitates healing and enables wellbeing The three parts of this book discuss writings from Africa the Americas Asia Europe the Middle East and Oceania that implore societies to shatter the devastating social stigmas which prevent billions from accessing effective care to increase the availability of quality person focused healthcare and to prioritize partnerships that facilitate healing and enable wellbeing for both patients and loved ones Thornber's Global Healing remaps the contours of comparative literature world literature the medical humanities and the health humanities Watch a video interview with Thornber by the Mahindra Humanities Center part of their conversations on Covid 19 Read an interview with Thornber on Brill's Humanities Matter blog *Communicating (with) Care* Sarah Bigi, 2016-08-15 At the start of studies on health communication scholars were primarily concerned with showing the ethical implications of a new approach to care and with collecting evidence to demonstrate its greater effectiveness as opposed to the paternalistic and mechanistic paradigms Well into the second decade of the 21st century different issues need to be addressed Aging

populations and the spread of chronic diseases are challenging the sustainability of health care systems worldwide increased awareness of health issues among the population and greater citizen participation seem to threaten clinicians authority In this new scenario it is acknowledged that the quality of verbal communication plays a crucial role but it is still not clear how it impacts on the outcomes of care which are its constitutive components and how it interacts with the institutional cultural and social context of interactions This book suggests that the time is ripe for a fresh start in health communication studies As Debra Roter points out in her foreword this proposal is ambitious in attempting to integrate perspectives derived from pragmatics and argumentation theory with those derived from quantitative methods of medical interaction analysis and its prediction of outcomes On the other hand as Giovanni Gobber explains in his foreword health communication can profit from an application of a performance oriented linguistic analysis that pays attention to the role of the various relevant context factors in speech events related to specific activity types In this way the open questions regarding communication in medical encounters are considered under a new light The answers provided open up novel lines of research and provide an original perspective to face the new challenges in medical care

Palliative Care Geoff Mitchell, 2018-05-08 Series Editors Moira Stewart Judith Belle Brown and Thomas R Freeman As the population in western cultures ages more people suffer chronic ultimately life limiting diseases and medical professionals need to be equipped to cope with the ever growing pressure of palliative care This book gives guidance on how to approach patients with life limiting illness While the problems most people present to the doctor appear relatively straightforward a whole person approach to understanding the complex interaction between the person their illness and their environment should lead to a more complete consideration of the illness and better health outcomes For issues of palliative care such an approach is essential to identify and meet the many needs of desperately ill people Palliative Care offers a fresh look at the management of patients With international evidence based contributions the book suggests practical and challenging ways to care for the dying It is ideal for all healthcare professionals working in palliative care General Practitioners and medicine and healthcare students
