Patricians And Parvenus Wealth And High Society In Wilhelmine Germany:

Patricians and Parvenus Dolores Augustine, 1994-08-04 In the period 1890-1914 the business elite in Germany turned their economy into the most dynamic in Europe. An older school of biographers tended to view the wealthiest businessmen as unique individuals, pioneers or geniuses who braved the rough waters of the business world alone or as part of an unusual family. Other biographers placed their subject in the context of the larger questions of German history: the aristocracy's supposed eclipse of the bourgeoisie, anti-Semitism, the rise of corporate capitalism, or war aims in World War I. Empirical research on businessmen as a group, an elite, or a segment of the bourgeoisie was long left to political and economic historians; social historians were primarily concerned with the working or lower middle class. This study takes a new approach, combining comprehensive quantitative data on the 502 wealthiest businessmen of the time with material from public and private papers and 200 autobiographies to produce a many-sided study of this group. Not only business history but family and social history, gender roles, ethnicity, class relations, consumption patterns, and broader historical factors are synthesized in the first coherent view of the social world of the wealthy business elite of Wilhelmine Germany. The extensive bibliography alone will no doubt be an invaluable resource for years to come.

Neo-Tories Bernhard Dietz, 2018-05-31 The danger to British democracy in the interwar period came from a different source to that which has thus far been assumed. It came from a network of radical conservatives who challenged the political system and sought to replace it with an authoritarian corporate state. In this book Bernhard Dietz provides the first systematic analysis of this network and its members, which are called Neo Tories. With strong links to the European right, yet a minority back home, this group of British conservatives are all the more fascinating today because it is on their ultimate failure that the success of British democracy rested.

Germans, Jews, and Antisemites Shulamit Volkov, 2006-07-24 The ferocity of the Nazi attack upon the Jews took many by surprise. Volkov argues that a new look at both the nature of antisemitism and at the complexity of modern Jewish life in Germany is required in order to provide an explanation. While antisemitism had a number of functions in pre-Nazi German society, it most particularly served as a cultural code, a sign of belonging to a particular political and cultural milieu. Surprisingly, it only had a limited effect on the lives of the Jews themselves. By the end of the nineteenth century, their integration was well advanced. Many of them enjoyed prosperity, prestige, and the pleasures of metropolitan life. This book stresses the dialectical nature of assimilation, the lead of the Jews in the processes of modernization, and finally their continuous efforts to invent a modern Judaism that would fit their new social and cultural position.

Soldiers as Police Anja Johansen, 2017-11-28 This book looks at the policing of social and political protest and of the role played by the French and Prussian armies in maintaining public order in the

years leading up to the First World War The period 1890 to 1914 was characterised by mass protest in both countries as the political social and economic order of the German Empire and the French Third Republic were repeatedly challenged by industrial disputes public protest and riots In Berlin and Paris the political elites urgently needed to find ways of sustaining economic growth while maintaining political stability through their management of law and order enforcement At the same time public authorities had to carefully consider how protest was to be policed in a way that would not further alienate important groups from the existing regime Confronted with this dilemma the use of the French and Prussian armies in maintenance of public order became an increasing concern for the government ministers provincial administrators and military commanders of both countries During the 1890s however the use of troops for protest policing in these two countries took diverging trajectories As well as examining the differing methods of policing of social and political protest this work also investigates the internal functioning of the French Third Republic and the German Empire in particular the relationship between the civil and military elites at the central and regional levels By examining the use of troops in the two most industrialised areas of Germany and France the Westphalian Ruhr district and the French region of Nord Pas de Calais the study describes how the governments and the provincial administrations in the two countries adopted distinctly dissimilar paths towards modernisation of protest policing
