

In the Matatag curriculum (the revised version of the K to 12 curriculum) and the K to 12 curriculum in the Philippines, the teaching of mathematics in the primary grades is built on several theoretical and philosophical foundations aimed at developing mathematical literacy, critical thinking, and problem-solving skills from an early age. Let's explore these theoretical and philosophical underpinnings:

1. Constructivism

- **K to 12 Curriculum:** This theory suggests that learners actively construct their understanding of mathematical concepts by interacting with their environment and solving problems in meaningful contexts. In the K to 12 curriculum, learners are encouraged to engage in activities that require them to think, explore, and arrive at solutions through experience.
- **Matatag Curriculum:** Similarly, the Matatag curriculum continues to emphasize learning through hands-on activities and real-life problem-solving, aligning with the constructivist approach. The focus is on building learners' understanding of mathematics through discovery and exploration, fostering deeper engagement with concepts.

2. Cognitivism (Developmental Approach)

- **K to 12 Curriculum:** Influenced by Jean Piaget's stages of cognitive development, the curriculum acknowledges that children in primary grades (ages 6-12) are in the concrete operational stage. This means they understand concepts better when they are grounded in tangible, real-world experiences. Hence, early grades focus on concrete objects, visual aids, and manipulatives to teach concepts like addition, subtraction, and measurement.
- **Matatag Curriculum:** The Matatag curriculum builds on this by further refining the use of visuals and manipulatives, ensuring that lessons are developmentally appropriate and cater to the evolving cognitive abilities of young learners.

3. Behaviorism (Mastery Learning)

- **K to 12 Curriculum:** While largely constructivist, the K to 12 curriculum also borrows from behaviorism, particularly in promoting mastery learning. Key mathematical skills, such as basic arithmetic operations, are practiced repeatedly to ensure fluency. Assessment methods such as formative assessments are used to reinforce learning.
- **Matatag Curriculum:** In Matatag, there is a stronger emphasis on ensuring mastery of fundamental concepts, especially in mathematics, with the aim of reducing "learning gaps" early on. Through repetition, feedback, and corrective instruction, learners are guided to achieve a solid understanding of basic skills.

4. Problem-Based Learning (PBL)

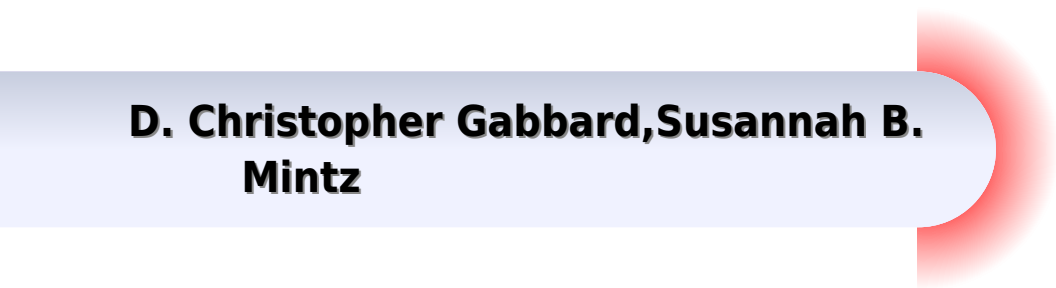

- **K to 12 Curriculum:** This curriculum promotes problem-based learning as a way to encourage critical thinking and collaboration. Learners are presented with real-world problems to solve, requiring them to apply mathematical concepts creatively and logically.
- **Matatag Curriculum:** In Matatag, there is a renewed focus on applying mathematics to everyday situations and practical problems. This aligns with PBL, where learners engage in tasks that make mathematics relevant to their daily lives, encouraging higher-order thinking and analytical skills.

5. Realistic Mathematics Education (RME)

- **K to 12 Curriculum:** The principles of RME are reflected in the contextualization of mathematics lessons in everyday situations, making mathematics more relatable and

The Object of My Affection Is in My Reflection Rokelle Lerner, 2010-01-01 In her latest book relationship expert Rokelle Lerner tackles the innerworkings of narcissism and offers compassionate and realistic advice for surviving a relationship with those afflicted with this personality disorder A Narcissist can make life exhilaratingly exciting one minute and sheer hell the next A narcissist has no qualms about taking another s money love admiration body or soul to satisfy their unquenchable hunger They are not inherently evil but unfortunately their wounds compel them to act in ways that are sometimes unconscionable damaging and ultimately tragic Whether a mother in law friend coworker or boss sometimes it s impossible to avoid narcissists so instead of being miserable or taken advantage of Rokelle Lerner shares her insights on the dynamics behind this personality disorder to give readers the tools to cope with narcissists including Learning to see narcissists as they see themselves Creating defense factors to ward them off Maintaining a balanced relationship based on mutual love not one sided narcissism

The Oxford Handbook of German Philosophy in the Nineteenth Century Michael N. Forster, Kristin Gjesdal, 2015 The Oxford Handbook of German Philosophy in the Nineteenth Century is the first collective critical study of this important period in intellectual history The volume is divided into four parts The first part explores individual philosophers including Fichte Hegel Schopenhauer Marx and Nietzsche amongst other great thinkers of the period The second addresses key philosophical movements Idealism Romanticism Neo Kantianism and Existentialism The essays in the third part engage with different areas of philosophy that received particular attention at this time including philosophy of nature philosophy of mind philosophy of language philosophy of history and hermeneutics Finally the contributors turn to discuss central philosophical topics from skepticism to materialism from dialectics to ideas of historical and cultural Otherness and from the reception of antiquity to atheism Written by a team of leading experts this Handbook will be an essential resource for anyone working in the area and will lead the direction of future research

Patterns of Dissonance Rosi Braidotti, 2013-05-28 This book is a brilliant and timely analysis of the complex issues raised by the relation between women and philosophy It offers a critical account of a wide range of contemporary philosophical and feminist texts and it develops this account into an original project of critical feminist thought Braidotti examines contemporary French philosophy as practised by men such as Foucault and Derrida showing that they rely on a notion of the feminine in order to undermine classical thought which bears no direct relevance to the historical experience of women Braidotti then looks at the attempts of contemporary feminist thinkers in Europe and the United States to show the gendered nature of discursive power games She discusses the contributions of Luce Irigaray and many other feminist theorists to the understanding of sexual difference and of its implications for philosophy and politics This book will be of interest to students and researchers in women s studies feminist theory social theory cultural studies philosophy and literature and anyone interested in contemporary feminism and the relation between feminist theory post structuralism and psychoanalysis

Thinking about

Society: Theory and Practice Ian Jarvie, 2012-12-06 I C Jarvie was trained as a social anthropologist in the center of British social anthropology the London School of Economics where Bronislaw Malinowski was the object of ancestor worship Jarvie's doctorate was in philosophy however under the guidance of Karl Popper and John Watkins He changed his department not as a defector but as a rebel attempting to exorcize the ancestral spirit He criticized the method of participant observation not as useless but as not comprehensive it is neither necessary nor sufficient for the making of certain contributions to anthropology rather it all depends on the problem situation And so Jarvie remained an anthropologist at heart who in addition to some studies in rather conventional anthropological or sociological molds also studied the tribe of social scientists but also critically examining their problems especially their overall rather philosophical problems but not always so a few of the studies included in this volume exemplify his work on specific issues whether of technology or architecture or nationalism in the academy or moviemaking or even movies exhibiting excessive sex and violence These studies attract his attention both on account of their own merit and on account of their need for new and powerful research tools such as those which he has forged in his own intellectual workshop over the last two decades

Psychology without Foundations Steve D Brown, Paul Stenner, 2009-08-03 For many years for many people social psychology has been deemed a discipline in crisis This new book proposes a way out of the crisis by letting go of the idea that psychology needs new foundations or a new identity whether biological discursive or cognitive The psychological is not narrowly confined to any one aspect of human experience it is quite literally everywhere The book proposes a strong process oriented approach to the psychological which studies events or occasions Aspects of experience such as communication or embodiment are treated as thoroughly mediated the product of multiple intersecting relationships between the biological the psychic and the social The outcome is an image of a mobile reflexively founded discipline which follows the psychological wherever it takes us from the depths of embodiment to the complexities of modern global politics

Common Sense in Early 18th-Century British Literature and Culture Christoph Henke, 2014-10-14 While the popular talk of English common sense in the eighteenth century might seem a by product of familiar Enlightenment discourses of rationalism and empiricism this book argues that terms such as common sense or good sense are not simply synonyms of applied reason On the contrary the discourse of common sense is shaped by a defensive impulse against the totalizing intellectual regimes of the Enlightenment and the cultural climate of change they promote in

order to contain the unbounded discursive proliferation of modern learning Hence common sense discourse has a vital regulatory function in cultural negotiations of political and intellectual change in eighteenth century Britain against the backdrop of patriotic national self concepts This study discusses early eighteenth century common sense in four broad complexes as to its discursive functions that are ethical which at that time implies aesthetic as well transgressive as a corrective political in patriotic constructs of the nation and repressive of otherness The selection of texts in this study strikes a balance between dominant literary culture Swift Pope Defoe Fielding Johnson and the periphery such as pamphlets and magazine essays satiric poems and patriotic songs

A Cultural History of Disability in the Long Eighteenth Century

D. Christopher Gabbard, Susannah B. Mintz, 2023-05-17 18th century philosopher Edmund Burke wrote deformity is opposed not to beauty but to the complete common form If one of the legs of a man be found shorter than the other the man is deformed because there is something wanting to complete the whole idea we form of a man During the long 18th century new ideas from aesthetics and the emerging scientific disciplines of physics biology and zoology contributed to changing fundamental notions about human form function and ability The interrelated concepts of the natural and the beautiful coalesced into a hegemonic ideology of form one which defined communal standards regarding which aspects of human appearance and ability would be considered typical and socially acceptable and which would not An essential resource for researchers scholars and students of history literature culture and education A Cultural History of Disability in the Long Eighteenth Century explores such themes and topics as atypical bodies mobility impairment chronic pain and illness blindness deafness speech learning difficulties and mental health
