

FITTED

STYLE NAME: 'OHE KAPALA (HAWAIIAN AIRLINES KAPA DESIGN)

DESCRIPTION: ARCHITECTURAL/GRAPHIC ELEMENT

MANA'O

The hoku or star. In ancient times, native Hawaiians, and other Polynesians, journeyed across the Pacific, navigating primarily with an encyclopedic knowledge of the stars in the night sky. In this instance, the star references guidance as well as the concept of travel.

The rounded, triangular shapes represent the currents of the ocean, or kai which was another essential navigational tool for early long-distance travelers in Polynesia.

The manu, or bird represents the concept of flight and the airplanes used for modern day travel.

The interlocking triangles (an ever-present Hawaiian motif) references the manner by which global travel is used to connect different peoples, cultures, and ideas.

Kanaka or human beings. The trapezoids represent individuals while the groups are used to symbolize ohana or families.

The wa'a or canoe symbolizes the traditional Hawaiian vessel for travel.

* These elements are repeated twice in the pattern to symbolize two distinct groups or cultures being brought together as one.

Patterns And Meanings:

Patterns and Meanings Alan Partington, 1998-01-01 Patterns and Meanings consists of case studies which make use of corpora and concordance technology Each case study elaborates a problem area makes reference to both the descriptive and applied literature thus far and then suggests ways of exploiting corpus data to shed light on the problem Language phenomena investigated include word sense phraseology and syntax metaphor and creative use text reference idiom and translation Emphasis is given to information that usually cannot be found in dictionaries grammars language textbooks or other resources but which the study of corpus data makes available This work is particularly important not only for its language description insights but also for pedagogical application Further useful suggestions are included on setting up a medium sized corpus on a personal computer

Pattern Grammar Susan Hunston, Gill Francis, 2000 This book describes an approach to lexis and grammar based on the concept of phraseology and of language patterning arising from work on large corpora The notion of pattern as a systematic way of dealing with the interface between lexis and grammar was used in Collins Cobuild English Dictionary 1995 and in the two books in the Collins Cobuild Grammar Patterns series 1996 1998 This volume describes the research that led to these publications and explores the theoretical and practical implications of the research The first chapter sets the work in the context of work on phraseology The next two chapters give several examples of patterns and how they are identified Chapters 4 and 5 discuss and exemplify the association of pattern and meaning Chapters 6 7 and 8 relate the concept of pattern to traditional approaches to grammar and to discourse Chapter 9 summarizes the book and adds to the theoretical discussion as well as indicating the applications of this approach to language teaching The volume is intended to contribute to the current debate concerning how corpora challenge existing linguistic theories and as such will be of interest to researchers in the fields of grammar lexis discourse and corpus linguistics It is written in an accessible style however and will be equally suitable for students taking courses in those areas

The Concept of Meaning Hill, Thomas E, 2014-02-25 First published in 2002 This is Volume VIII of seventeen in the Library of Philosophy series on Metaphysics Written in 1974 the most significant studies of meaning are rightly focused upon restricted ranges of meanings but occasional attempts to see the subject in larger perspective are also required The present inquiry is concerned with meanings of words in languages and of spoken and written sentences but it is also concerned with a wider spectrum including meanings of spoken and written sentences of signs and symbols of physical and historical events of material objects and mental images of poems and paintings of sculptures and symphonies and even of life and of the universe

Classical Theorists in the Social Sciences Dejo Abdulrahman, 2023-05-05 This book is a useful companion to every social science student who desires an understanding of classical theoretical developments in and evolution of the disciplines

Prof. Jun Yeh, Tallinn University of Technology, Estonia, 2014-07-07 amount of new knowledge every day We have to acknowledge that even the smartest people among us are incapable of familiarizing himself with all these new data

Fortunately we are only required to deal with a very small amount of that vast number in our work and life As those who devote himself to the field of information technology and management engineering I sincerely believe that it is our responsibility to make efforts to accelerate the advance of science in such fields The 2014 international Conference on Information Technology and Management Engineering thanks to the hard work of its committee will be held on April 26 and 27 in Hong Kong The ITME2014 covers a wide range of topics such as network protocols information theory and coding theory network security management theory project management public management knowledge management etc It is a great honor to us that numerous people from various countries including many famous experts and excellent researchers have shown their interest in this convention and submitted their latest studies to us as their support Among these studies we have selected about a hundred to be finally included in this proceeding after reviewing and discussing We believe that this collection of work will be of great value not only to the participants of ITME2014 but also to those who has a chance of meeting it The publication of this conference proceedings and the successful opening of ITME2014 owe its credit to a lot of people and institutions especially the ITME2014 committee the editors and DEStech Publications The committee has devoted much time to reviewing the papers submitted to ITME2014 and DEStech Publications publishing those accepted papers I would like to thank the committee and the press deeply here for their support to ITME2014 and I am eagerly looking forward to another chance for us to be a team again Finally let s wish together that the 2014 International Conference on Information Technology

Introduction to Systemic Functional Linguistics Suzanne Eggins,2004-01-01 Introduction to systemic functional linguistics explores the social semiotic approach to language most closely associated with the work of Michael Halliday and his colleagues

The Social Foundations of Meaning Eike v. Savigny,2012-12-06 An empirical case study is used here to analyze linguistic meaning as it is embedded in complex social behavior The whole of a natural signalling system its nonlinguistic conventions pragmatics and semantics is considered Three sections analyze the relevant conventional facts conventional utterance meaning in terms of conventional facts and finally sentence meaning in terms of conventional utterance meaning Linguistic meaning is seen to be derived from meaningful social behavior rather than from goal directed behavior of individuals A number of new results on pragmatic and semantic meaning are reached

Verb Valency Patterns Susen Faulhaber,2011-04-29 Taking as its point of departure the general assumption that meaning is crucial in accounting for verb complementation this volume presents the results of an empirical study of verb complementation patterns of semantically similar English verbs The semantic parallels of the verbs selected are based on their coverage in dictionaries first and foremost the Valency Dictionary of English Herbst Heath Roe and G tz 2004 as well as corpus research and native speaker assessments It is demonstrated that despite obvious similarities in complementation between such verbs there are still a significant number of syntactic discrepancies which cannot be accounted for on the basis of meaning alone and that semantic factors such as selection restrictions and aspectual properties do not sufficiently correlate with the verbs

syntactic properties and consequently do not have sufficient explanatory power. Thus the results rigorously challenge so-called projectionist approaches which assume the position that complementation is determined by semantic properties and thus ought to be predictable on this basis. In the light of a general trend towards placing greater emphasis on semantic aspects in the fields of construction grammar and cognitive grammar too, the number of idiosyncratic phenomena on the level of single complements as well as whole patterns clearly underlines the importance of storage phenomena as opposed to rule-based generation. As such it stresses the necessity of finding ways to systematically account for item-specific properties of verbs in any grammatical theory of the English language. The book is targeted at all linguists interested in the relationship between semantics and syntax which is one of the prevalent questions in modern linguistics also in the field of construction grammar and cognitive grammar. Since the data is presented in a way which is compatible with various theories of complementation, the target group is clearly not restricted to any specific linguistic school. Because of the large amount of item-specific information presented, this book is also a valuable source for grammarians and lexicographers.

Structure, Content and Meaning of Organizational Networks Peter Groenewegen, Julie E. Ferguson, Christine Moser, John Mohr, Stephen P. Borgatti, 2017-10-12. This volume explores recent advances in network research strengthening theorizing on social structures and meaning in and between organizational networks. The volume will interest researchers seeking to explain organizational phenomena through the analysis of communications and information from archival, secondary, electronic sources.

Making Meanings, Creating Family Cynthia Gordon, 2009-08-12. A husband echoes back words that his wife said to him hours before as a way of teasing her. A parent always uses a particular word when instructing her child not to talk during naptime. A mother and family friend repeat each other's instructions as they supervise a child at a shopping mall. Our everyday conversations necessarily are made up of old elements of language: words, phrases, paralinguistic features, syntactic structures, speech acts, and stories that have been used before, which we recontextualize and reshape in new and creative ways. In *Making Meanings, Creating Family*, Cynthia Gordon integrates theories of intertextuality and framing in order to explore how and why family members repeat one another's words in everyday talk as well as the interactive effects of those repetitions. Analyzing the discourse of three dual-income American families who recorded their own conversations over the course of one week, Gordon demonstrates how repetition serves as a crucial means of creating the complex shared meanings that give each family its distinctive identity. *Making Meanings, Creating Family* takes an interactional sociolinguistic approach, drawing on theories from linguistics, communication, sociology, anthropology, and psychology. Its presentation and analysis of transcribed family encounters will be of interest to scholars and students of communication studies, discourse analysis, sociolinguistics, linguistic anthropology, and psychology, especially those interested in family discourse. Its engagement with intertextuality as theory and methodology will appeal to researchers in media, literary, and cultural studies.
