Disease and Healing in the Indus Civilisation
Robert Arnott, 2024-04-25 This book provides insights into health disease and healing in the Indus Civilisation during the third to early second millennia BCE Based on original research it examines skeletal remains material culture and environmental factors The book sheds light on diseases healing practices and public health in this ancient civilization

Philosophical Urbanism Abraham Akkerman, 2019-10-16 This book expands on the thought of Walter Benjamin by exploring the notion of modern mind pointing to the mutual and ongoing feedback between mind and city form Since the Neolithic Age volumes and voids have been the founding constituents of built environments as projections of gender as spatial allegories of the masculine and the feminine While these allegories had been largely in balance throughout the early history of the city increasingly during modernity volume has overcome void in city form This volume investigates the pattern of Benjamin's thinking and extends it to the larger psycho cultural and urban contexts of various time periods pointing to environmental progression in the unfolding of modernity

The Indigenous Paleolithic of the Western Hemisphere
Paulette F. C. Steeves, 2021-07-2022 Choice Outstanding Academic Title The Indigenous Paleolithic of the Western Hemisphere is a reclaimed history of the deep past of Indigenous people in North and South America during the Paleolithic Paulette F C Steeves mines evidence from archaeology sites and Paleolithic environments landscapes and mammalian and human migrations to make the case that people have been in the Western Hemisphere not only just prior to Clovis sites 10 200 years ago but for more than 60 000 years and likely more than 100 000 years Steeves discusses the political history of

American anthropology to focus on why pre Clovis sites have been dismissed by the field for nearly a century She explores supporting evidence from genetics and linguistic anthropology regarding First Peoples and time frames of early migrations Additionally she highlights the work and struggles faced by a small yet vibrant group of American and European archaeologists who have excavated and reported on numerous pre Clovis archaeology sites In this first book on Paleolithic archaeology of the Americas written from an Indigenous perspective *The Indigenous Paleolithic of the Western Hemisphere* includes Indigenous oral traditions archaeological evidence and a critical and decolonizing discussion of the development of archaeology in the Americas

In Search of the Broad Spectrum Revolution in Paleolithic Southwest Europe Emily Lena Jones, 2015-10-07 The people who inhabited Southwest Europe from 30 000 to 13 000 years ago are often portrayed as big game hunters and indeed in some locations Cantabrian Spain the Pyrenees the Dordogne the archaeological record supports this interpretation But in other places notably Mediterranean Iberia the inhabitants focused their hunting efforts on smaller game such as rabbits fish and birds Were they less effective hunters Were these environments depleted of red deer and other large game Or is this evidence of Paleolithic people s adaptability This volume explores these questions along the way delving into the history of the bigger equals better assumption optimal foraging theory and niche construction theory and patterns of environmental and subsistence change across the Pleistocene Holocene transition

Ride of the Second Horseman Robert L. O'Connell, 1997-10-23 Accurst be he that first invented war wrote Christopher Marlowe a declaration that most of us would take as a literary not literal construction But in this sweeping overview of the rise of civilization Robert O Connell finds that war is indeed an invention an institution that arose due to very specific historical circumstances an institution that now verges on extinction In *Ride of the Second Horseman* O Connell probes the distant human past to show how and why war arose He begins with a definition that distinguishes between war and mere feuding war involves group rather than individual issues political or economic goals and direction by some governmental structure carried out with the intention of lasting results With this definition he finds that ants are the only other creatures that conduct it battling other colonies for territory and slaves But ants unlike humans are driven by their genes in humans changes in our culture and subsistence patterns not our genetic hardware brought the rise of organized warfare O Connell draws on anthropology and archeology to locate the rise of war sometime after the human transition from nomadic hunting and gathering to agriculture when society split between farmers and pastoralists Around 5500 BC these pastoralists initiated the birth of war with raids on Middle Eastern agricultural settlements The farmers responded by ringing their villages with walls setting off a process of further social development intensified combat and ultimately the rise of complex urban societies dependent upon warfare to help stabilize what amounted to highly volatile population structures beset by frequent bouts of famine and epidemic disease In times of overpopulation the armies either conquered new lands or self destructed leaving fewer mouths to feed In times of underpopulation slaves were taken to provide labor O Connell explores the histories of the civilizations of ancient Sumeria

Egypt Assyria China and the New World showing how war came to each and how it adapted to varying circumstances On the other hand societies based on trade employed war much more selectively and pragmatically Thus Minoan Crete long protected from marauding pastoralists developed a wealthy mercantile society marked by unmilitaristic attitudes equality between men and women and a relative absence of class distinctions In Assyria by contrast war came to be an end in itself in a culture dominated by male warriors Despite the violence in the world today O Connell finds reason for hope The industrial revolution broke the old patterns of subsistence war no longer serves the demographic purpose it once did Fascinating and provocative Ride of the Second Horseman offers a far reaching tour of human history that suggests the age old cycle of war may now be near its end

The Shaping of Western Civilization Michael Burger,2013-09-26 Michael Burger s goal in this inexpensive overview is to provide a brief historical narrative of Western civilization Not only does its length and price separate this text from the competition but its no frills uncluttered format and well written one authored approach make it a valuable asset for every history student The Shaping of Western Civilization begins with the ancient Near East and ends with globalization Unlike other textbooks that pile on dates and facts Shaping is a more coherent and interpretive presentation Burger s skills as writer and synthesizer will enable students to obtain the background required to ask meaningful questions of primary sources In addition to suggestions for further reading this overview includes over 50 images and 22 maps

The Making of the West, Combined Volume Lynn Hunt,2012-01-04 Students of Western civilization need more than facts They need to understand the cross cultural global exchanges that shaped Western history to be able to draw connections between the social cultural political economic and intellectual happenings in a given era and to see the West not as a fixed region but a living evolving construct These needs have long been central to The Making of the West The book s chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context enabling students to witness the unfolding of Western history understand change over time and recognize fundamental relationships Read the preface

The Evolution of Human Language Wolfgang Wildgen,2004-06-30 Wolfgang Wildgen presents three perspectives on the evolution of language as a key element in the evolution of mankind in terms of the development of human symbol use 1 He approaches this question by constructing possible scenarios in which mechanisms necessary for symbolic behavior could have developed on the basis of the state of the art in evolutionary anthropology and genetics 2 Non linguistic symbolic behavior such as cave art is investigated as an important clue to the developmental background to the origin of language Creativity and innovation and a population s ability to integrate individual experiments are considered with regard to historical examples of symbolic creativity in the visual arts and natural sciences 3 Probable linguistic fossils of such linguistic innovations are examined The results of this study allow for new proposals for a protolanguage and for a theory of language within a broader philosophical and semiotic framework and raises interesting questions as to human consciousness universal grammar and linguistic methodology Series B
