Patterns Of Parliamentary Behaviour Passage Of Legislation Across Western:

Patterns of Parliamentary Behavior Herbert Döring, 2017-03-02 This volume begins where the first D ring book of 1995 finished by considering what effects the rules had on legislative output during the same period It addresses four distinct yet complementary research topics the connection between a number of veto players and law production in West European parliamentary democracies the impact of closed versus open rules the effects of committee structure and organization on the degree of conflict or consensus on the procedure of passing legislation the importance of agenda setting and agenda control for the prevention of cycling across issues and the distribution of particular benefits of shifting and transient majorities Fundamental to this volume is the ability of the project group to fashion an original data set As a consequence this volume is able to ascertain the extent to which parliamentary procedures contributed to shaping policy output in this field during the 1980s

The Oxford Handbook of Time and Politics Klaus Goetz, 2024 The Oxford Handbook on Time and Politics is the first major publication that surveys time centered research in political science across its sub disciplines As such it integrates and consolidates an emergent body of knowledge but also aims to inspire future scholarship The Handbook highlights that paying systematic attention to time in political analysis yields questions and insights that are of relevance to a very broad range of political scientists working within different theoretical methodological and epistemological traditions The Handbook covers comparative politics and government public policy international relations and political theory Its authors are drawn from more than a dozen countries

Impending Challenges to Penal Moderation in France and Germany Kirstin Drenkhahn, Fabien Jobard, Tobias Singelstein, 2023-07-27 This book investigates the penal culture in France and Germany how it is shaped in politics media and public opinion Although compared with the US or the UK France and Germany seem to place a strong emphasis on the ideal of rehabilitation that would block excessive punishment and other outcomes of punitive developments in society there is a steady increase in punitiveness over time for which the term strained restraint is proposed The book shows that the idea of penal moderation is deeply rooted in public opinion politics and the media and that it is renegotiated every day in a dynamic interplay between these spheres Punishment and society research has traditionally focused on the US and the UK In comparative research both are considered extreme in punitive developments with high rates of imprisonment and large groups of the population under penal control The other extreme in comparative research would be Scandinavia with the famous Nordic Exceptionalism marked by low prison population rates Germany and France are often considered to be the same when compared with each other and the other with reference to both of these extremes However this book shows that France and Germany are far from being the same when it comes to state organization centralistic vs federal criminal justice and the criminal law political traditions and the media Also research from both countries has looked at whether developments such as the punitive turn have occurred in Germany and France Research focused on the domestic situation concludes that punitiveness is on the rise

and that both countries are indeed experiencing their own punitive turn How do we reconcile these contradictory findings Why do these two seem to follow the path of penal moderation in the overall outcome of punishment in society when we look at comparative research And how is it that from a domestic perspective punitive attitudes and desires are leading to more punitiveness By focusing on the meso level with a comparative perspective on the two countries and a dynamic analytical approach this book reconciles the fluidity of individual attitudes and opinions with the relative stability of societal discourse The authors posit that penal moderation comes at a price overall and in an internationally comparative perspective there is penal moderation but a closer look at the domestic situation and development reveals that it is nonetheless challenged by a slowly rising tide of punitiveness Going beyond the main tenets of punishment and society research with a dynamic analysis of two large societies in Europe this book is ideal reading for scholars and students of penology criminal justice and European studies

The EU Timescape Klaus Goetz, Jan-Hinrik Meyer-Sahling, 2013-09-13 The manner in which time is institutionalized is critical to how a political system works Terms time budgets and time horizons of collective and individual political actors rights over timing sequencing and speed in decision making and the temporal properties of policy matter to the distribution of power efficiency and effectiveness of policy making and democratic legitimacy This book makes a case for the systematic study of political time in the European Union EU both as an independent and a dependent variable and highlights the analytical value added of a time centred analysis The book discusses previous scholarship on the institutionalization of political time and its consequences along the dimensions of polity politics and policy reviews dominant perspectives on political time which centre on power system performance and legitimacy and presents case studies that illustrate the importance of time in the governance of the EU This book was originally published as a special issue of *Journal of European Public Policy*

Comparative Politics Daniele Caramani, 2008 *Comparative Politics* provides a comprehensive introduction to political systems around the world It covers methods and theories the nation state institutions actors and processes policies and recent changes

Comparing and Classifying Legislatures David Arter, 2013-09-13 Recent years have witnessed substantial work in the legislative studies field But what do we know about legislatures today and are there clear criteria for comparing and classifying them This is a new review of the state of our knowledge of parliament and tackles key questions Do legislatures matter in legislative terms and if so how much What is the extent of the legislature's control of the legislative process How can we classify legislatures on the basis of their relative legislative performance Five measures of the policy power of parliaments are applied in the country region chapters This book was previously published as a special issue of the leading *Journal of Legislative Studies*
