Paul Rudolph Library Of Contemporary Architects:

Paul Rudolph Paul Rudolph, Rupert Spade, 1971 *The Architecture of Paul Rudolph* Timothy M. Rohan, 2014-07-10
Equally admired and maligned for his remarkable Brutalist buildings Paul Rudolph 1918 1997 shaped both late modernist architecture and a generation of architects while chairing Yale's department of architecture from 1958 to 1965 Based on extensive archival research and unpublished materials *The Architecture of Paul Rudolph* is the first in depth study of the architect neglected since his postwar zenith Author Timothy M Rohan unearths the ideas that informed Rudolph's architecture from his Florida beach houses of the 1940s to his concrete buildings of the 1960s to his lesser known East Asian skyscrapers of the 1990s Situating Rudolph within the architectural discourse of his day Rohan shows how Rudolph countered the perceived monotony of mid century modernism with a dramatically expressive architecture for postwar America exemplified by his Yale Art and Architecture Building of 1963 famously clad in corrugated concrete The fascinating story of Rudolph's spectacular rise and fall considerably deepens longstanding conceptions about postwar architecture Rudolph emerges as a pivotal figure who anticipated new directions for architecture ranging from postmodernism to sustainability

Paul Rudolph, 1971 *A Critical History of Contemporary Architecture* Elie G. Haddad, David Rifkind, 2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

Contemporary Architects Muriel Emanuel, 2016-01-23 *Catalog of the Avery Memorial Architectural Library of Columbia University. 2d Ed., Enl Avery Library*, 1968 *Materialized Space: The Architecture of Paul Rudolph* Abraham Thomas, 2024-09-30
Architect Paul Rudolph 1918 1997 was known for his iconic modern houses and exemplary Brutalist buildings in exposed concrete Rudolph's popularity peaked during the 1950s and 1960s when he served as the chair of Yale University's Department of Architecture but his work fell from favor with the advent of postmodernism in the 1970s This compact volume provides an introduction to and long overdue reassessment of the architect's trailblazing career from his modernist Florida houses to his public and institutional buildings unrealized megastructures experimental interiors and later mixed use developments in Asia Abraham Thomas examines how Rudolph explored concepts such as functionalism urbanism and modular construction across decades and continents Richly illustrated with photographs of the structures and Rudolph's own

drawings as well as models furniture and period press clippings this book sheds light on the architect's process and takes up themes as important in his time as in our own such as civic design housing development and experimental materials and methods
