Quest For Comets An Explosive Trail Of Beauty And Danger:

The Quest for Comets David H. Levy, 2014-01-15 **The Quest for Comets** David H. Levy, 2013-11-11 The brilliant trailing beauty of fiery comets has inspired fear wonder and awe since the dawn of human history Brighter than stars moving and disappearing in their own singular orbits comets have been among the most mysterious elements in the sky eluding our understanding until very recently With the aid of space probes scientists have discovered that these swiftly moving chunks of ice and carbon are more plentiful and far more dangerous than suspected Scientists are also beginning to realize the monumental role played by comets in the development of the Earth and solar system David Levy describes in dramatic detail the thrilling yet often devastating effects of comet collisions In the dawn of our solar system the Earth was barraged with comets that may have carried the materials necessary to lay the foundations for life on this planet Levy also presents compelling evidence for later comet collisions including those of the age of dinosaurs Great impacts Levy asserts not only caused the extinction of the dinosaurs but ushered in new species of life As Levy so clearly explains scientists are realizing that comet collisions are virtually inevitable Levy reveals possible future collisions with the Earth and describes the terrible risks to life they would pose He even shows how we might prepare to withstand the impact of large comets in the future

David Levy's Guide to Observing and Discovering Comets David H. Levy, 2003-05-15 David Levy has held a lifelong passion for comets and is one of the most successful comet discoverers in history In this book he describes the observing techniques that have been developed over the years from visual observations and searching to photography through to electronic charge coupled devices CCDs He combines the history of comet hunting with the latest techniques showing how our understanding of comets has evolved over time This practical handbook is suitable for amateur astronomers from those who are casually interested in comets and how to observe them to those who want to begin and expand an observing program of their own Drawing widely from his own extensive experience Levy describes how enthusiastic amateurs can observe comets and try to make new discoveries themselves David H Levy is one of the world's foremost amateur astronomers He has discovered seventeen comets seven using a telescope in his own backyard and had a minor planet Asteroid 3673 Levy named in his honor He is best known as the co discoverer of the famous 1994 Shoemaker Levy 9 comet Levy is frequently interviewed in the media and succeeded Carl Sagan as science columnist for Parade magazine He has written and contributed to a number of books most recently David Levy's Guide to the Night Sky Cambridge 2001

Cosmic Discoveries David H. Levy, 2010-09-09 For many millennia the starry night sky has been a source of wonder and awe to men and women who have tried to unravel the mystery of the billion distant lights that fill the heavens after dark The story of the great discoverers who succeeded in explaining part of the mystery is told here with the joy and infectious enthusiasm that only a fellow discoverer can convey David Levy codiscoverer of Comet Shoemaker Levy 9 with his wife Wendee Wallach Levy evokes that marvelous moment of Eureka as he masterfully relates each story He gives the reader a

glimpse of the enthralling adventure of cosmic discovery through stories of the most famous and brilliant astronomers. Beyond their personal accomplishments, these scientists expanded all of humanity's understanding of the universe and our place within it. For example, Galileo's breathtaking discovery of the moons of Jupiter, new worlds that refused to orbit the sun, challenged the whole doctrine of the earth being the center of the universe. With the start of the 20th century, Shapley pushed back the envelope that had been opened by Galileo by proving that the center of our galaxy is very far beyond our own sun. And Hubble showed that even our galaxy is but a tiny part of a universe that is rapidly expanding. In describing these milestones of science, Levy reveals his own spirited conversations with such luminaries of the imagination as the discoverer of the planet Pluto, Clyde Tombaugh, and one of the world's greatest science fiction writers, Sir Arthur C. Clarke. Through Levy's unique perspective on cosmic discovery, he is able to connect his own personal life story with that of astronomers of the past and, by extension, with the history of the whole universe. As the codiscoverer of the spectacular comet that crashed into Jupiter, Levy formulated a whole new range of exciting questions about the universe: Do comets serve to transport the elements of life from one planet to the next? What is the evidence that a large comet once hit the earth? Will the earth someday be in danger of colliding with another such comet, and will we have the technology to stop it? This fascinating book will excite any of us who have stared at the night sky in awe and amazement. David Levy and Wendee Wallach Levy, Vail, AZ, are continuing their ongoing search for new comets. David Levy is the president of the Jarnac Observatory, science editor for *PARADE* magazine, a contributing editor to *Sky* and *Telescope* and *Sky News* magazines, and the author of *Starry Nights: The Quest for Comets and Impact Jupiter* among other books. [Space Exploration and Humanity](#) American Astronautical Society, 2010-08-23. A complete history of human endeavors in space, this book also moves beyond the traditional topics of human spaceflight, space technology, and space science to include political, social, cultural, and economic issues, and also commercial, civilian, and military applications. In two expertly written volumes, *Space Exploration and Humanity: A Historical Encyclopedia* covers all aspects of space flight in all participating nations, ranging from the Cold War era beginnings of the space race to the lunar landings and the Apollo-Soyuz mission, from the Shuttle disasters and the Hubble telescope to Galileo, the Mars Rover, and the International Space Station. The book moves beyond the traditional topics of human spaceflight, space technology, and space science to include political, social, cultural, and economic issues, and also commercial, civilian, and military applications. Produced in conjunction with the History Committee of the American Astronautical Society, this work divides its coverage into six sections, each beginning with an overview essay followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science, civilian and commercial space applications, human spaceflight, and microgravity science, space and society, and space technology and engineering. Whether investigating a specific issue or event, or tracing an overarching historic trend, students and general readers will find this an invaluable resource for launching their study of one of humanity's most extraordinary endeavors. *Quest for Comets* David H. Levy, 1995-09-01.

Lets delve into the realm of bestselling books, exploring the fascinating narratives that have enthralled audiences this year. Quest For Comets An Explosive Trail Of Beauty And Danger : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Quest For Comets An Explosive Trail Of Beauty And Danger : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
