Raising Eyebrows:

Raising Eyebrows Dal LaMagna, 2010-10-18 The often hilarious and sometimes poignant story behind Dal LaMagna's rise in the beauty industry. By the time LaMagna graduated from the Harvard Business School his entrepreneurial activities including operating discotheques in drive-in theaters, working with the 1960s musical teen sensations the Cowsills, and opening an ice cream parlor on the Venice Beach boardwalk had landed him 150,000 of debt. *Raising Eyebrows* tells the story of how he finally succeeded. After years of failures and living penniless, LaMagna founded Tweezerman, one of the world's most respected innovative and successful beauty tool manufacturers with over 40 million customers. A leader for socially responsible companies, Tweezerman became a success by making helping communities and caring for the environment everyday practices not publicity gimmicks. A responsible capitalist, LaMagna wrote this roller coaster memoir for entrepreneurs who are struggling and disenchanted with the every-changing economic system. Packed with business lessons, financial plans, and practical advice, *Raising Eyebrows* is full of inspiration, conscience, and good ideas for entrepreneurs and would-be entrepreneurs everywhere.

Ethnopragmatics Cliff Goddard, 2011-04-20 The studies in this volume show how speech practices can be understood from a culture internal perspective in terms of values, norms, and beliefs of the speech communities concerned. Focusing on examples from many different cultural locations, the contributing authors ask not only What is distinctive about these particular ways of speaking but also Why from their own point of view do the people concerned speak in these particular ways? What sense does it make to them? The ethnopragmatic approach stands in opposition to the culture external universalist pragmatics represented by neo-Gricean pragmatics and politeness theory. Using cultural scripts and semantic explications, techniques developed over 20 years, work in cross-cultural semantics by Anna Wierzbicka and colleagues, the authors examine a wide range of phenomena including speech acts, terms of address, phraseological patterns, jocular irony, facial expressions, interactional routines, discourse particles, expressive derivation, and emotionality. The authors and languages are: Anna Wierzbicka, English; Cliff Goddard, Australian English; Jock Wong, Singapore English; Zhengdao Ye, Chinese; Catherine Travis, Colombian Spanish; Rie Hasada, Japanese; and Felix Ameka, Ewe. Taken together, these studies demonstrate both the profound cultural shaping of speech practices and the power and subtlety of new methods and techniques of a semantically grounded ethnopragmatics. The book will appeal not only to linguists and anthropologists but to all scholars and students with an interest in language communication and culture.

The Expression of the Emotions in Man and Animals Charles Darwin,2016-02-22 INTRODUCTION MANY works have been written on Expression but a greater number on Physiognomy that is on the recognition of character through the study of the permanent form of the features With this latter subject I am not here concerned The older treatises 1 which I have consulted have been of little or no service to me The famous Conférences 2 of the painter Le Brun published in 1667 is the best known ancient work and contains some good remarks Another somewhat old essay namely the Discours delivered 1774 1782 by the well known Dutch anatomist Camper 3 can hardly be considered as having made any marked advance in the subject The following works on the contrary deserve the fullest consideration Sir Charles Bell so illustrious for his discoveries in physiology published in 1806 the first edition and in the third edition of his Anatomy and Philosophy of Expression 4 He may with justice be said not only to have laid the foundations of the subject as a branch of science but to have built up a noble structure His work is in every way deeply interesting it includes graphic descriptions of the various emotions and is admirably illustrated It is generally admitted that his service consists chiefly in having shown the intimate relation which exists between the movements of expression and those of respiration One of the most important points small
