done in an underground dental clinic But there are moments of triumph too founding her own nonprofit working on films that tell important stories and working with her co author Dr Garcia to tell her story in a framework that lays bare the realities of structural oppression As Alix and Antero tally the costs of undocumented life they present a final bill of what is owed to the immigrant community In this way their book flips the traditional narrative about the economics of immigration on its head

Shumaker, 2007-03-30 When psychologists Shumaker and Heckel wrote their earlier book on Children Who Murder it became clear to them that society specifically a significant portion of its young members is in crisis Focused on this crisis these authors found an everyday issue that makes life more challenging for parents who are trying to raise kids of good character The issue is this There are extensive differences now in the family the school environment the community and even religious institutions compared to previous generations For example families of today rarely have a coherent extended family And by far in most regions dual working parents are common as are single parents and stepfamilies Church activities events and agents are not as evident in the community as they were in the past Schools under increasing demand for testing and measurement take less time to devote to issues of character Altogether the changes are significant and can leave parents searching for ways to instill character in their kids Shumaker and Heckel spotlight these historical changes and also ways parents today are succeeding in creating kids of character nonetheless When authors Shumaker and Heckel wrote their earlier book on Children Who Murder it became clear to them that society specifically a significant portion of its young members is in crisis Focused on this crisis these authors found an everyday issue that makes life more challenging for parents trying to raise kids of character The challenge is this there are extensive differences now in the family the school environment the community and even religious institutions compared to previous generations For example families of today rarely have a coherent extended family Dual working parents are common Church activities events and agents are not nearly as evident in the community as they were in the past And schools under increasing demand for testing and measurement devote far less time to issues of character than they did in the past Altogether the changes are significant and can leave parents at a loss for how to best develop character in their kids Shumaker and Heckel show us how some parents are creatively handling this challenge The authors do not argue that most American kids are out of hand cruel or immoral They are neither cynics nor prophets of doom What they do see is a disappearance of supports for parents making the adults job more demanding Yet they pinpoint ways some parents are succeeding in this new millennium This book begins by explaining the basics of moral development in children reviewing recent research findings It offers parents teachers professors administrators clergy and legislators helpful tools to promote character

**Children's Human Rights and Public Schooling in the United States** Julia Hall, 2013-02-11 Promotion Text for Children s Human Rights and Public Schooling in the United States Julia Hall The United States tends to portray itself as a human rights leader However human rights concerns are confronted everyday by people in this democracy including children The purpose of this volume is to bring attention to the fact that against the backdrop of neoliberal expansion serious human rights violations are taking place among children everywhere including in the US The daily struggles among groups of school children in the US are specifically considered here such as children who are sorted by race homeless children transient children child refugees children as targeted by human traffickers and or child migrant workers As the economy continues to constrict more and more young people find themselves struggling to grow up on these razor thin margins of survival Given current economic arrangements such margins are widening The definition of children s human rights as understood in this analysis is taken directly from the UN Convention on the Rights of the Child CRC Here emphasis is placed on ways in which the CRC could be used to serve more effectively the needs of the most vulnerable populations of school age children in the US and elsewhere Public schools could be the very place where children come to understand they have rights Unfortunately many children do not get this information Instead the protections stated in the CRC and the realities of the lives of so many children are often

worlds apart This volume sets out to be a part of changing this

Measuring and Monitoring Children's Well-Being Asher Ben-Arieh,Natalie Hevener Kaufman,Arlene Bowers Andrews,Robert M. George,Bong Joo Lee,L. J. Aber,2013-03-09 Today any regular newspaper reader is likely to be exposed to reports on manifold forms of physical emotional sexual child abuse on the one hand and abnormal behavior misconduct or offences of children and minors on the other hand Occasionally reports on children as victims and children as offenders may appear on the same issue or even the same page Rather seldom the more complex and largely hidden phenomena of structural hostility or indifference of society with a view to children are being dealt with in the press Such fragmentary ambiguous incoherent or even contradictory perception of children in modern society indicates that firstly there is a lack of reliable information on modern childhood and secondly children are still treated as a comparatively irrelevant population group in society This conclusion may be surprising in particular when drawn at the end of The Century of the Child proclaimed by Ellen Key as early as 1902 Actually there exist unclarities and ambiguities about the evolution of childhood in the last century not only in public opinion but also in scientific literature While De Mause

with his psycho historic model of the evolution of childhood comprising different stages from infanticide abandonment ambivalence intrusion socialisation to support underlines the continuous improvement of the condition of childhood throughout history and thus rather confirms Key s expectations Aries with his social history of childhood seems to hold a more culturally pessimistic view
