**On Myself, and Other, Less Important Subjects** Caspar Hare,2009-07-13 Caspar Hare makes an original and compelling case for egocentric presentism a view about the nature of first person experience about what happens when we see things from our own particular point of view A natural thought about our first person experience is that all and only the things of which I am aware are present to me Hare however goes one step further and claims counterintuitively that the thought should instead be that all and only the things of which I am aware are present There is in other words something unique about me and the things of which I am aware On Myself and Other Less Important Subjects represents a new take on an old view known as solipsism which maintains that people's experiences give them grounds for believing that they have a special distinguished place in the world for example believing that only they exist or that other people do not have conscious minds like their own Few contemporary thinkers have taken solipsism seriously But Hare maintains that the version of solipsism he argues for is in indeed defensible and that it is uniquely capable of resolving some seemingly intractable philosophical problems both in metaphysics and ethics concerning personal identity over time as well as the tension between self interest and the greater good This formidable and tightly argued defense of a seemingly absurd view is certain to provoke debate

**An All-Consuming Century** Gary Cross,2000-09-14 The unqualified victory of consumerism in America was not a foregone conclusion The United States has traditionally been the home of the most aggressive and often thoughtful criticism of consumption including Puritanism Prohibition the simplicity movement the 60s hippies and the consumer rights movement But at the dawn of the twenty first century not only has American consumerism triumphed there isn't even an ism left to challenge it An All Consuming Century is a rich history of how market goods came to

dominate American life over that remarkable hundred years between 1900 and 2000 and why for the first time in history there are no practical limits to consumerism By 1930 a distinct consumer society had emerged in the United States in which the taste speed control and comfort of goods offered new meanings of freedom thus laying the groundwork for a full scale ideology of consumer s democracy after World War II From the introduction of Henry Ford s Model T so low in price that no man making a good salary will be unable to own one and the innovations in selling that arrived with the department store window displays self service the installment plan to the development of new arenas for spending amusement parks penny arcades baseball parks and dance halls Americans embraced the new culture of commercialism with reservations However Gary Cross shows that even the Depression the counterculture of the 1960s and the inflation of the 1970s made Americans more materialistic opening new channels of desire and offering opportunities for more innovative and aggressive marketing The conservative upsurge of the 1980s and 90s indulged in its own brand of self aggrandizement by promoting unrestricted markets The consumerism of today thriving and largely unchecked no longer brings families and communities together instead it increasingly divides and isolates Americans Consumer culture has provided affluent societies with peaceful alternatives to tribalism and class war Cross writes and it has fueled extraordinary economic growth The challenge for the future is to find ways to revive the still valid portion of the culture of constraint and control the overpowering success of the all consuming twentieth century

**Watchdogs and Whistleblowers** Stephen Brobeck, Robert N. Mayer, 2015-07-20 This book is the most comprehensive and up to date source of information about ways in which consumer activism has reshaped the economic and political well being of citizens in the United States and around the world This all encompassing collection of information about consumer activism and the consumer movement will provide students public officials business groups and other activists with a one stop source of facts and insights The contributors explore hundreds of major consumer protections that have significantly enhanced the quality of life and safety for all Americans showing how these protections were won through the skillful and determined work of leading activists and activist organizations Many of the stories told here are related by the activists themselves often for the first time More than 140 entries offer a comprehensive treatment of the consumer activism of specific organizations their leaders and strategies The book also includes more than 40 entries about consumer movements in Europe Asia Africa and Latin America A timeline of key events and a listing of the most important books on the subject of consumer activism help provide context for the individual entries as do two introductory essays Cross references in each entry establish linkages among topics

Journalism at the End of the American Century, 1965-Present James Brian McPherson,2006-06-30 McPherson captures the best and worst aspects of American journalism since 1965 The press has evolved into a conglomeration of entities that today can be described as pervasive entertaining and justifiably mistrusted In some ways today s press offers the best journalism Americans have ever seen In other ways the modern news media fall short of the ideals held by most of those who care about journalism and far short of the promise they once seemed to offer in terms of helping create an enlightened democracy Neither a paeon to the press nor an exercise in media bashing this book finds much to criticize and to praise about recent American journalism while illustrating that traditional journalistic values have diminished in importance not just for many of those who control the media but also for the media consumers who most need good journalism Chapters are devoted to various themes that include social unrest the influence of entertainment values technological shifts media consolidation and corporatization issues of content versus context new kinds of news media and why the 1970s may have been the high point of American journalism Events and issues given extra attention include the rise of television news and later CNN the Civil Rights Movement and other race related issues the Women s Movement various forms of alternative journalism wars in Vietnam and Iraq investigative journalism the World Trade Center attacks the Clinton Lewinsky scandal the 2000 and 2004 presidential campaigns and elections civic journalism and journalism scandals      Planning, Regulation, and Competition: Automobile Industry - 1968, Hearings Before Subcommittees ... 90-2, on the Question: are Planning and Regulation Replacing Competition in the American Economy?
