Headstrong and Unorthodox Pioneers for a Critical Theory of Consumption Michael-Burkhard Piorkowsky,Karl Kollmann,2023-08-28 This volume offers contributions on the fundamentals of current consumption theory and consumption research which have developed almost entirely from originally unorthodox approaches against traditional micro and macroeconomic theory The inspiration came mainly from social economic behavioural research and ecological economics But the reception is very patchy and the history is largely forgotten With reference to the work of earlier authors new arguments are offered to the current discussion about delimitations and paradoxes in consumption and the still narrowly understood consumer role It is as much about rework in sharpening the understanding of consumption and consumers in their lifeworlds as it is about indications of fruitfulness for the analysis of open questions It is about arguments for a paradigmatic reorientation of consumer research and policy The contributions address in particular ambivalences options and future modes in consumption in the search for individual satisfaction and ecological sustainability This book is a translation of an original German edition The translation was done with the help of artificial intelligence machine translation by the service

DeepL com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation **Strength in Numbers** Gunnar Trumbull,2012-10-31 Consumers feel powerless in the face of big industry and the dominant view of economic regulators agrees with them Trumbull argues that this represents a misreading of the historical record and the core logic of interest representation Weak interests he reveals quite often emerge the victors in policy battles by forging unlikely alliances
