Hollywood to divinise stars as Apollos and Venuses for the modern age and defined a model of stardom that is still with us  
today Sound in the Age of Mechanical Reproduction David Suisman, Susan Strasser, 2010 During the twentieth century  
sound underwent a dramatic transformation as new technologies and social practices challenged conventional aural  
experience As a result sound functioned as a means to exert social cultural and political power in unprecedented and  
unexpected ways The fleeting nature of sound has long made it a difficult topic for historical study but innovative scholars  
have recently begun to analyze the sonic traces of the past using innovative approaches Sound in the Age of Mechanical  
Reproduction investigates sound as part of the social construction of historical experience and as an element of the sensory  
relationship people have to the world showing how hearing and listening can inform people's feelings ideas decisions and  
actions The essays in Sound in the Age of Mechanical Reproduction uncover the varying dimensions of sound in twentieth

century history Together they connect a host of disparate concerns from issues of gender and technology to contests over intellectual property and government regulation Topics covered range from debates over listening practices and good citizenship in the 1930s to Tokyo Rose and Axis radio propaganda during World War II to CB radio culture on the freeways of Los Angeles in the 1970s These and other studies reveal the contingent nature of aural experience and demonstrate how a better grasp of the culture of sound can enhance our understanding of the past
