Architecting Fail-Safe Supply Networks Shabnam Rezapour,Amirhossein Khosrojerdi,Golnoosh Rasoulifar,Janet K. Allen,Jitesh H. Panchal,Ramakrishnan S. Srinivasan,Jeffrey D. Tew,Farrokhs Mistree,2018-09-06 A fail safe supply network is designed to mitigate the impact of variations and disruptions on people and corporations This is achieved by 1 developing a network structure to mitigate the impact of disruptions that distort the network structure and 2 planning flow through the network to neutralize the effects of variations In this monograph we propose a framework develop mathematical models and provide examples of fail safe supply network design We show that contrary to current thinking as embodied in the supply network literature disruption management decisions made at the strategic network design level are not independent from
