## **Rape Helping The Victim:**

Rape Susan Halpern,1978      **Victims of Rape** United States. Congress. House. Select Committee on Children, Youth, and Families,1990      **Rape Work** Patricia Yancey Martin,2013-01-11 Despite the proliferation of rape crisis centers and other improvements in the treatment of rape victims over the past 20 years many victims still find themselves the victims of what has been called a second rape by doctors lawyers judges police and administrators that process them This book takes a critical look at the organizations and officials that process rape victims to see how the structure of their respective organizations often prevent them from providing responsive care      Helping Victims of Violent Crime Diane L. Green,Albert R. Roberts,2008-06-23 Over the past two decades violent crime has become one of the most serious domestic problems in the United States Approximately 13 million people nearly 5% of the U S population are victims of crime every year and of that approximately one and a half million are victims of violent crime Ensuring quality of life for victims of crime is therefore a major challenge facing policy makers and mental health providers Helping Victims of Violent Crime grounds victim assistance treatments in a victim centered and strengths perspective The book explores victim assistance through systems theory the holistic notion of examining the client in his her environment and a key theoretical underpinning of social work practice The basic assumption of systems theory is homeostasis A crime event causes a change in homeostasis and often results in disequilibrium The victim's focus at this point is to regain equilibrium Under the systems metatheory coping crisis and attribution theories provide a good framework for victim centered intervention Stress and coping theories posit that three factors determine the state of balance perception of the event available situational support and coping mechanisms Crisis theory offers a framework to understand a victim's response to a crime The basic assumption of crisis theory asserts that when a crisis occurs people respond with a fairly predictable physical and emotional pattern The intensity and manifestation of this pattern may vary from individual to individual Finally attribution theory asserts that individuals make cognitive appraisals of a stressful situation in both positive and negative ways These appraisals are based on the individual's assertion that they can understand predict and control circumstances and result in the victim's assignment of responsibility for solving or helping with problems that have arisen from the crime event In summary these four theories can delineate a definitive model for approach to the victimization process It is from this theoretical framework that Treating Victims of Violent Crime offers assessments and interventions with a fuller understanding of the victimization recovery process The book includes analysis of victims of family violence child abuse elder abuse partner violence as well as stranger violence sexual assault homicide and terrorism      **Rape, Victims, and Investigations** Shana Maier,2014-06-13 Despite changes to laws and attitudes rape continues at epidemic levels worldwide As gatekeepers to the criminal justice system law enforcement officers are important to the processing of rape cases and their interactions with victims can potentially affect the victim's reaction to and recovery from rape In order to better understand rape and the processing of cases through the
