Rural Housing, Exurbanization, and Amenity-Driven Development Mark Lapping,2016-04-15 Rural America is progressing through a dramatic and sustained post industrial economic transition For many traditional means of household sustenance gained through agriculture mining and rustic tourism are giving way to large scale corporate agriculture footloose and globally competitive manufacturing firms and mass tourism on an unprecedented scale These changes have brought about an increased presence of affluent amenity migrants and returnees as well as growing reliance on low wage seasonal jobs to sustain rural household incomes This book argues that the character of rural housing reflects this transition and examines this using contemporary concepts of exurbanization rural amenity based development and comparative distributional descriptions of the haves and the have nots Despite rapid in migration and dramatic changes in land use there remains a strong tendency for communities in rural America to maintain the idyllic small town myth of large lot single family home ownership This neglects to take into account the growing need for affordable housing both owner occupied and rental properties for local residents and seasonal workers This book suggests that greater emphasis be placed in rural housing policies that account for this rapid social and economic change and the need for affordable rural housing alternatives

Subcommittee on Regional and Community Development,1977 **The South's Development** Manufacturers record, Baltimore,Manufacturers' record Publishing Company,1924 **Violence among the Mentally III** Sheilagh Hodgins,2012-12-06 The NATO Advanced Study Institute on the Prevention of Crime and Violence Among the Mentally III was held in May 1999 in Tuscany Italy Participants from 15 countries attended Since care for persons with mental illness schizophrenia major depression bipolar disorder delusional disorder atypical psychoses has been deinstitutionalized some persons with these disorders are committing crimes and serious violence Consequently societies around the world are confronted with a new challenge to provide mental health care and social services to mentally ill persons in a humane way that will prevent illegal behaviours Research in this field has been dominated by investigations designed to improve clinicians accuracy in predicting violent behaviours with little attention focused on the organization and implementation of treatments The premise of the Advanced Study Institute was that treatments must have empirically

proven efficacy Both professional ethics and public accountability require empirical evidence that each treatment will alleviate the problem that it targets However despite the fact that Western industrial societies provide treatment for mentally ill persons who have offended there is a very limited base of knowledge on what constitutes effective treatment and how such treatments should be organized and delivered The Advanced Study Institute was an attempt to stimulate and encourage research that will extend this knowledge base The goals were to review what is known about mentally ill offenders and about effective treatments for them and to provide a framework for the orientation of future investigations designed to improve treatment efficacy
