## **Rare Trades Making Things By Hand In The Digital Age:**

Rare Trades Lyn Beasley, Chris Mulvany, Gwen Michener, 2003      Rare Trades Mark Thomson, 2002 The nature of work is changing We no longer use our hands to make things Human hands capable of making objects of great utility and beauty are now used to dial phones and press computer keys We feel that loss keenly This book pays tribute to a kind of skilled manual work that has become so rare from coopers to wheelwrights      **Homebrew Gaming and the Beginnings of Vernacular Digitality** Melanie Swalwell, 2021-08-17 The overlooked history of an early appropriation of digital technology the creation of games through coding and hardware hacking by microcomputer users From the late 1970s through the mid 1980s low end microcomputers offered many users their first taste of computing A major use of these inexpensive 8 bit machines including the TRS System 80s and the Sinclair Atari Microbee and Commodore ranges was the development of homebrew games Users with often self taught programming skills devised the graphics sound and coding for their self created games In this book Melanie Swalwell offers a history of this era of homebrew game development arguing that it constitutes a significant instance of the early appropriation of digital computing technology Drawing on interviews and extensive archival research on homebrew creators in 1980s Australia and New Zealand Swalwell explores the creation of games on microcomputers as a particular mode of everyday engagement with new technology She discusses the public discourses surrounding microcomputers and programming by home coders user practices the development of game creators ideas with the game Donut Dilemma as a case study the widely practiced art of hardware hacking and the influence of 8 bit aesthetics and gameplay on the contemporary game industry With Homebrew Gaming and the Beginnings of Vernacular Digitality Swalwell reclaims a lost chapter in video game history connecting it to the rich cultural and media theory around everyday life and to critical perspectives on user generated content      *DiY WiFi: Re-imagining Connectivity* K. Jungnickel, 2013-12-19 Based on extensive fieldwork Jungnickel s research into community WiFi networking explores the innovative digital cultures of ordinary people making extra ordinary things Committed to making ournet not the internet these digital tinkerers re inscribe wireless broadband technology with new meanings and re imagined possibilities of use      *Overland*, 2002      *Books in the Digital Age* John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution What is the role of the book in an age preoccupied with computers and the internet How has the book publishing industry been transformed by the economic and technological upheavals of recent years and how is it likely to change in the future This is the first major study of the book publishing industry in Britain and the United States for more than two decades Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present He shows that each sector is characterized by its own distinctive logic or dynamic of change and that by reconstructing this logic we can understand the problems challenges and opportunities faced by publishing firms today He also shows that the digital revolution has had and continues to have a profound impact on

the book publishing business although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators Books in the Digital Age will become a standard work on the publishing industry at the beginning of the 21st century It will be of great interest to students taking courses in the sociology of culture media and cultural studies and publishing It will also be of great value to professionals in the publishing industry educators and policy makers and to anyone interested in books and their future

**A Beautiful Anarchy: How to Create Your Own Civilization in the Digital Age** Jeffrey Tucker, 2012

A Beautiful Anarchy: How to Create Your Own Civilization in the Digital Age is Jeffrey Tucker's rhapsodic hymn to the digital age and a call to use the tools it has granted us to enhance human freedom and reduce and end intellectual dependency on the state. It shows that every truly valuable aspect of our lives extends not from politics and the regime but from our own voluntary choices. The aims of A Beautiful Anarchy are 1 to draw attention to the reality that surrounds us but we hardly ever bother to notice much less celebrate 2 to urge a willingness to embrace this new world as a means of improving our lives regardless of what the anachronistic institutions of power wish us to do 3 to elucidate the causes and effects that have created this new world and 4 to urge more of the good institutions that have created this beautiful anarchy. This book covers the uses of social media the blessed end of the nation state the way the government is destroying the physical world the role of commerce in saving humanity the depredations of nation state monetary policy the evil of war and the lie of national security and private societies as agents of liberation. And it offers a hopeful prognosis for a creative and productive world without central control. The book is topical pithy and anecdotal yet points to the big ideas and the larger picture to help frame the great economic and political debates of our time. Book description Amazon.com
