Rare Birds In Britain And Ireland:

Rare Birds in Britain and Ireland J.N Dymond,P.A Fraser,S.J.M Gantlett,2010-11-30 This trio of rare bird specialists have produced not only a book of great fascination for those who delight in rarities for their own sake but one that offers valuable information on changing patterns of arrival which may indicate changes of status of these birds within their breeding range This book is a successor to two earlier works Scarce Migrant Birds in Britain and Ireland Sharrock 1974 and Rare Birds in Britain and Ireland Sharrock 1976 It unifies both of the earlier books and updates them adding more than 80 species to the previous total The authors have analysed and considered some 45 000 records of scarce and rare birds in Britain and Ireland for the period 1958-85 Extreme rarities outside the period are also listed More than 300 species accounts are now included most of them accompanied by histograms of weekly and seasonal occurrences with maps showing distribution by counties in spring and autumn or at particular times of the year For rarities with twelve or fewer occurrences during the period 1958-85 the place date and other relevant information is given for each record Every species is illustrated by a line drawing more than 150 of them commissioned for this book the remainder being selected from the two earlier works

Rare Birds in Britain and Ireland J.T.R. Sharrock,E.M Sharrock,2010-11-30 Dr J T R Sharrock is uniquely placed to write about the rare birds of Britain and Ireland He is a member of all three bodies which adjudicate on such records honorary secretary of the British Ornithologists Union's Records Committee and a member of both the British Birds Rarities Committee and the Irish Records Panel He is already the author of a companion book which deals with a selection of the commoner rarities Scarce Migrant Birds in Britain and Ireland In this new much fuller book the enormous task of collation of over 8000 records and their visual display as maps and histograms was carried out by Mrs E M Sharrock The textual and visual analysis deals with 221 different species Between them the authors present a complete picture of rare birds in Britain and Ireland HOW MANY are seen WHEN do they occur HOW regularly do they come WHERE are they seen There are line drawings of all 221 species by well known bird artists Robert Gillmor P J Grant R A Richardson D I M Wallace and Ian Willis Jacket design by Robert Gillmor

Rare Birds in Britain and Ireland Keith Vinicombe,David Cottridge,1996 Since a Gold winged Warbler flew across the Atlantic and attracted 3000 people in one day to a supermarket car park identifying rarities has become the birdwatching activity of the 1990s Twitching as it is called now has over 15 000 dedicated people with magazines telephone hot lines and Internet sites spreading information on what has been seen when and by whom This text catalogues the events and problems involved in identifying the first and subsequent sightings of the rare birds that have appeared in Britain and Ireland It brings together information on the weather conditions the problems involved in seeing each particular bird who saw it and how many times that species has reappeared and where This is the information that is of interest to twitchers as it gives them a unique insight into when the species might reappear and thus when they should organize their trips

Rare Birds Day by Day Steve Dudley,2010 *Rare Birds Day by Day* follows three

earlier Poyser titles looking at scarce and rare birds recorded in Britain and Ireland Scarce Migrant Birds in Britain and Ireland Sharrock 1974 Rare Birds in Britain and Ireland Sharrock Sharrock 1976 and Rare Birds in Britain and Ireland Dymond Fraser Gantlett 1989 Like these previous books this latest rare bird title has been brought to you by well known and experienced British birders and rare bird finders This book however differs markedly from the earlier volumes in that it moves away from the traditional presentation of species in systematic order Covering 282 rare species and sub species plus records for a further 18 Category D species found in Britain and Ireland around 20 000 individual records of rare birds are listed in diary style with each individual bird appearing on the date on which it was originally found along with all the other rare birds found on that date between 1958 and 1994 Each record is listed in county order and is accompanied by the finding site number of birds for multiple records and length of stay for those birds remaining for more than one day This new and novel way of presenting rare bird data will prove fascinating to anyone with an interest in finding and watching rare migrant and vagrant species It will also prove a valuable and fun tool for the keenest rarity hunters enabling them to use the book as a rare bird predictor by following closely the birds found on each date over the 36 years covered by the book The book is enlivened with illustrations by Dave Nurney most of them specifically prepared for this volume Bloomsbury Publishing

A. Naylor, 1996 **The Historical Atlas of Breeding Birds in Britain and Ireland 1875-1900** Simon Holloway, 2010-01-31 The landscape of Britain has been irreversibly changed over the last century Modern agriculture urban expansion industry and transport have all left their mark altering the face of the countryside forever Shifting with the changing scene the fortunes of Britain and Ireland's bird populations have fluctuated dramatically over the years As current farming practices have evolved the natural habitats and breeding patterns of many species have been disrupted Urban and industrial growth has brought with it the pressures of new land use pesticides pollution and human interference The activities of sportsmen collectors and farmers have also taken their toll over the years The new Poyser title The Historical Atlas of Breeding Birds in Britain and Ireland 1875 1900 is a fascinating book resulting from years of meticulous research by the author Simon Holloway who provides an absorbing account of the distribution changes of Britain and Ireland's birds over the last quarter of a century Large colour distribution maps and their accompanying text paint a species by species picture of a period which completely transformed the landscape of this country It is says Natural World magazine a classic case of why did no one write this book before The experienced birder using a knowledge of species requirements can only marvel at what the long vanished landscapes were then like Birdwatch praises Simon Holloway's achievement saying This book brings together so much information from disparate sources and its status maps present such a clear picture of our late Victorian avifauna that it should take its place beside the BTO atlases on the bookshelf While Birdwatching adds If you are interested

in the historical side of birds and their populations this book will be an endless source of fascination As with all Poyser publications the attention to detail the lovingly produced illustrations and the sheer breadth of knowledge demonstrated by the author
