authority *Public and Private Education in America* Casey D. Cobb, Gene V Glass, 2021-09-23 This title will give students and other readers a clear understanding of the true state of public and private education systems in the United States by refuting falsehoods, misunderstandings and exaggerations and confirming the validity of other assertions. This work is part of a series that uses evidence-based documentation to examine the veracity of claims and beliefs about high-profile issues in American culture and politics. Each book in the Contemporary Debates series is intended to puncture rather than perpetuate myths that diminish our understanding of important policies and positions to provide needed context for misleading statements and claims and to confirm the factual accuracy of other assertions. This particular volume examines beliefs, claims and myths about public and private K-12 education in the United States. Issues covered include categories of public and private schools and variations in academic performance and socioeconomic status therein, controversies surrounding school choice including school vouchers and charter schools, accountability and assessment of private and public schools, debates about school environment, safety and curricula, and teacher and administrator quality. All of these issues are examined in individualized entries with objective responses grounded in up-to-date evidence. **NEA Research Bulletin** , 1928

Research bulletin , 1927 **Learning and Doing Policy Analysis in Education: Examining Diverse Approaches to Increasing Educational Access** Maria Teresa Tatto, Justin Bruner, Fida Hussain Chang, Corvett George Cramfield, Tara Miyoko Kintz, Nai-Cheng Kuo, Sandra Kurtti Pylvainen, Andleeb Sharif, 2012-09-17 This book originated in a policy analysis class at Michigan State University taught during 2010. Using Professor Tatto's unique approach to teaching policy analysis, the professor and students agreed to construct a class that represented a reflective and grounded experience in the policy analysis of a current and relevant issue with global ramifications. We began exploring policies that were developed at the global level and that were implemented locally. We investigated the surge of globally developed standards and regulations in an effort to improve education. Our goal was to learn cross-nationally about policies that seek to reform curriculum and instruction under efficiency and global competitiveness arguments such as Education for All (EFA) and its USA cousin No Child Left Behind (NCLB). We knew our work would be bounded by the time available in a one-semester class and by resource constraints. We did exploratory inquiry supported by literature reviews, reports on rigorous research studies and in one case an exploratory case study. The policies we chose to explore such as EFA and NCLB offered us the opportunity to examine current reform tendencies that are intended to provide access to quality education for all children, the preparation of teachers to support diverse populations, the organization of schools to accommodate these children in response to vague policy mandates and power issues affecting the different constituencies and stakeholders. The effects of these and other policies were difficult to track because research is scant and decisions are frequently made based on ideology or political persuasion. Our purpose was to explore the critical issues that originated such policies and to search for documented evidence regarding policy implementation and effectiveness. We investigated the factors that seemed to interfere with

successful implementation from conceptual theoretical and methodological perspectives In this class we learned that there are not ready set frameworks for policy analysis but rather that these have to be constructed according to the issues that emerge as policies are conceptualized and implemented to fit local contexts and needs The book pays particular attention to the contexts of policy including the evolving conceptualization of global and local systems of governance knowledge regimes and policy spaces The book is designed for faculty and doctoral students in education who are interested in understanding diverse frameworks for policy analysis and for those in the general public who are interested in the policies we analyze here
