Rational Decisionmaking In The Preservation Of Cultural Property:

Rational Decision-making in the Preservation of Cultural Property Norbert Sebastian Baer, Folke Snickars, 2001

Contemporary Theory of Conservation Salvador Munoz-Vinas, 2012-05-23 Classical theories of conservation are well known in the heritage community but in the last two decades thinking has shifted and classical theory has faced increasing criticism Contemporary Theory of Conservation brings together current ideas in conservation theory presenting a structured coherent analysis of the subject for the first time This engaging and readable text is split into 3 parts The first Fundamentals of conservation addresses the identity of conservation itself and problems arising when classical conservation theories are applied The second part Questioning classical theories delves deeper into the criticism of classical ideas such as reversibility This leads on to the creation of new paradigms such as sustainability which are covered in the final part of the book

Conservation ethics *Human-Centered Built Environment Heritage Preservation* Jeremy C. Wells, Barry L.

Stiefel, 2018-09-20 Human Centered Built Environment Heritage Preservation addresses the question of how a human centred conservation approach can and should change practice For the most part there are few answers to this question because professionals in the heritage conservation field do not use social science research methodologies to manage cultural landscapes assess historical significance and inform the treatment of building and landscape fabric With few exceptions only academic theorists have explored these topics while failing to offer specific usable guidance on how the social sciences can actually be used by heritage professionals In exploring the nature of a human centred heritage conservation practice we explicitly seek a middle ground between the academy and practice theory and application fabric and meanings conventional and civil experts and orthodox and heterodox ideas behind practice and research We do this by positioning this book in a transdisciplinary space between these dichotomies as a way to give voice and respect to multiple perspectives without losing sight of our goal that heritage conservation practice should fundamentally benefit all people We believe that this approach is essential for creating an emancipated built heritage conservation practice that must successfully engage very different ontological and epistemological perspectives **Handbook of Research on Heritage Management and Preservation**

Ngulube, Patrick, 2018-02-02 Archives museums and libraries are pivotal to the management and preservation of any society's heritage Heritage assets should be systematically managed by putting in place proper policies maintenance procedures security and risks measures and retrieval and preservation plans The Handbook of Research on Heritage Management and Preservation is a critical scholarly resource that examines different aspects of heritage management and preservation ranging from theories that underline the field areas of convergence and divergence in the field infrastructure and the policy framework that governs the field and the influence of the changing landscape on practice Featuring coverage on a broad range of topics such as community involvement records legislation and collection development this book is geared towards academicians researchers and students seeking current research on heritage management and preservation **The Oxford**
