Rational Mysticism John Horgan, 2004-03-22 The author of The End of Science chronicles the most advanced research into such experiences as prayer fasting and trances in this great read The Washington Post How do trances visions prayer satori and other mystical experiences work What induces and defines them Is there a scientific explanation for religious mysteries and transcendent meditation John Horgan investigates a wide range of fields chemistry neuroscience psychology anthropology theology and more to narrow the gap between reason and mystical phenomena As both a seeker and an award winning journalist Horgan consulted a wide range of experts including theologian Huston Smith spiritual heir to Joseph Campbell Andrew Newberg the scientist whose guest for the God module was the focus of a Newsweek cover story Ken Wilber prominent transpersonal psychologist Alexander Shulgin legendary psychedelic drug chemist and Susan Blackmore Oxford educated psychologist parapsychology debunker and Zen practitioner Horgan explores the striking similarities between mystical technologies like sensory deprivation prayer fasting trance dancing meditation and drug trips He participates in experiments that seek the neurological underpinnings of mystical experiences And finally he recounts his own search for enlightenment adventurous poignant and sometimes surprisingly comic Horgan's conclusions resonate with the controversial climax of The End of Science because as he argues the most enlightened mystics and the most enlightened scientists end up in the same place confronting the imponderable depth of the universe Medjugorje and the **Supernatural** Daniel Maria Klimek, 2018-03-01 In June 1981 six young Croatians in the village of Medjugorje in the former Yugoslavia reported that the Virgin Mary had appeared to them The Medjugorje visionaries say that Mary has returned every day since then bringing them important messages from heaven to convey to the world Throughout history people have reported encountering extraordinary religious experiences apparitions of the Virgin Mary visions of Jesus Christ weeping statues and icons the stigmata physical healings and miracles and experiences of the afterlife and interpreted them as supernatural in origin Scholars have often tried to reinterpret such experiences including those described by the great mystics like Francis of Assisi Catherine of Siena and Teresa of Avila into natural or psychopathological categories such as hysteria hallucination delusion epileptic seizures psychosis the workings of the unconscious mind or fraud Are such reductionist explanations valid Over the past three decades the Medjugorje visionaries have been subjected to extensive medical psychological and scientific examination even while undergoing their visionary experiences Daniel Klimek argues that the case of Medjugorje affords a rare opportunity to understand a deeper dimension of extraordinary religious phenomena Presenting and analyzing the scientific studies on the visionaries in juxtaposition with the major scholars and debates surrounding religious experience Klimek concludes that a multidisciplinary approach grants a more holistic and

deeper understanding of such extraordinary religious experiences An Introduction to the Study of Mysticism Richard H. and work in two laboratories that have played key roles in this development a human lab in Switzerland and an animal lab in California It sheds light on the central transnational axis of the resurgence connecting American psychedelic culture with the home country of LSD In the borderland of science and religion Neuropsychedelia explores the tensions between the use of hallucinogens to model psychoses and to evoke spiritual experiences in laboratory settings Its protagonists including the anthropologist himself struggle to find a place for the mystical under conditions of late modern materialism Conduct's Mind Over Manners Robin Abrahams, 2025-08-22 A witty sophisticated guide to the new principles of modern social behavior by a psychologist and popular alternative etiquette and ethics guru This is no rule book about forks and calling cards As a child Robin Abrahams was bitterly disappointed when her parents forced her to have a lemonade stand rather than a booth for dispensing advice In Miss Conduct's Mind over Manners Abrahams now a psychologist and the popular Miss Conduct columnist for The Boston Globe Sunday Magazine tackles the perplexing social dilemmas of our time Is it polite to say Bless you to a sneezing atheist Should a foreign person s name be pronounced in his native accent Does knitting at a meeting display a lack of attention or superior multitasking Can a restaurant these days still be so fancy that you cannot request a doggie bag with dignity What's a nice vegetarian to do if Gypsies give her bread smeared with lard Bringing to bear the insights of psychology Abrahams outlines eight steps to more graceful living that can be applied to uncertain situations and for handling the inevitable mistakes involving food religion children pets health sex money and more With humor compassion and gusto Miss Conduct s Mind over Manners delivers thoughtful and thought provoking advice for everyone navigating the complex world of modern human interaction *Information—Consciousness—Reality* James B. Glattfelder, 2019-04-10 This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age old enigmas of existence Over 300 years ago the human mind discovered the machine code of reality mathematics By utilizing abstract thought systems humans began to decode the workings of the cosmos From this understanding the current scientific paradigm emerged ultimately discovering the gift of technology Today however our island of knowledge is surrounded by ever longer shores of ignorance Science appears to have hit a dead end when confronted with the nature of reality and consciousness In this fascinating and accessible volume James Glattfelder explores a radical paradigm shift uncovering the ontology of reality It is found to be information theoretic and participatory yielding a computational and Voices of the Living Grail WB DeLong, 2004-09 A gripping page turning chronicle Voices presents programmable universe a dazzling display of drama adventure and suspense as it illuminates compelling mysteries the Church can no longer suppress The intriguing characters of this action packed tale reflect the spirituality that flows like an underground river into the pool of evolving human consciousness They yearn with all humanity for a deep connection with the Ultimate Source They reenact the timeless struggle against the violence and greed that prevents humankind from realizing that goal A Course of Severe and Arduous Trials Lynn Brunet, 2009 The artist Francis Bacon 1909 1992 and the writer Samuel Beckett 1906

1989 both convey in their work a sense of foreboding and confinement in bleak ritualistic spaces This book identifies many similarities between the spaces and activities they evoke and the initiatory practices of fraternal orders and secret societies that were an integral part of the social landscape of the Ireland experienced by both men during childhood Many of these Irish societies modelled their ritual structures and symbolism on the Masonic Order Freemasons use the term spurious Freemasonry to designate those rituals not sanctioned by the Grand Lodge The Masonic author Albert Mackey argues that the spurious forms were those derived from the various cult practices of the classical world and describes these initiatory practices as a course of severe and arduous trials This reading of Bacon s and Beckett s work draws on theories of trauma to suggest that there may be a disturbing link between Bacon's stark imagery Beckett's obscure performances and the unofficial use of Masonic rites Zen Buddhism and the Reality of Suffering Tullio Giraldi, 2024-09-10 This book offers an accessible guide to the role that Zen has played and alongside Buddhism might play in both Eastern and Western attempts to alleviate mental suffering Since its beginnings 2500 years ago the central belief of Buddhism has been that what we perceive as reality is a mental representation a religious belief which has since been substantiated by the evidence of neuroscience The work and progress of clinical medicine psychiatry and psychology have attempted to alleviate the sufferings of life but the current approaches to mental health in psychiatry the neurosciences and cognitivism don't fully address the complexity and mutual inter relationship of the variety of factors involved in mental suffering and its non linear and chaotic aspects Zen Buddhism on the other hand encourages access to reality and so this book will explore scientifically the ways in which it s guiding principles can be deployed to support and enhance Western clinical solutions to mental strife Spicer, 2017-07-05 This volume gathers together twenty articles from among the best scholarly writing on rock music published in academic journals over the past two decades These diverse essays reflect the wide range of approaches that scholars in various disciplines have applied to the study of rock from those that address mainly the historical sociological cultural and technological factors that gave rise to this music to those that focus primarily on analysis of the music itself This collection of articles some of which are now out of print or otherwise difficult to access provides an overview of the current state of research in the field of rock music and includes an introduction which contributes to the ongoing debate over the distinction or lack thereof betweenrock andpop Starstruck Albert A.
